COMMITTEE FOR MEDICINAL PRODUCTS FOR VETERINARY USE SUMMARY OF OPINION* LOXICOM

International Non-proprietary Name (INN): Meloxicam

On 10 February 2010, the Committee for Medicinal Products for Veterinary Use (CVMP) adopted a positive opinion,^{**} recommending to grant a marketing authorisation for a new presentation of the veterinary medicinal product Loxicom, 0.5mg/ml Oral Suspension for Cats, intended for the alleviation of inflammation and pain in chronic musculo-skeletal disorders in cats. The Applicant for this veterinary medicinal product is Norbrook Laboratories Limited.

The active substance of Loxicom is Meloxicam, a non-steroidal anti-inflammatory drug (NSAID), ATCvet code: QM01AC06, which acts by inhibition of prostaglandin synthesis, thereby exerting anti-inflammatory, analgesic, anti-exudative and antipyretic effects. It reduces leukocyte infiltration into the inflamed tissue. To a minor extent it also inhibits collagen-induced thrombocyte aggregation.

The benefits of Loxicom in cats are the alleviation of inflammation and pain in chronic musculoskeletal disorders. Typical adverse reactions of NSAIDs such as loss of appetite, vomiting, diarrhoea, faecal occult blood, apathy and renal failure have occasionally been reported. These adverse reactions occur generally within the first treatment week and are in most cases transient and disappear following termination of the treatment but in very rare cases may be serious or fatal.

The approved indication is: "alleviation of inflammation and pain in chronic musculo-skeletal disorders in cats".

Detailed conditions for the use of this product will be described in the Summary of Product Characteristics (SPC) which will be published in the European Public Assessment Report (EPAR) and will be available in all official European Union languages after the marketing authorisation has been granted by the European Commission.

The CVMP, on the basis of quality, safety and efficacy data submitted, considers that there is a favourable benefit to risk balance for Loxicom 0.5mg/ml Oral Suspension for Cats and therefore recommends the granting of the marketing authorisation.

^{*} Summaries of opinion are published without prejudice to the Commission Decision, which will normally be issued within 90 days from adoption of the Opinion.

^{**} Applicants may appeal any CVMP opinion, provided they notify the EMEA in writing of their intention to appeal within 15 days of receipt of the opinion.
