
EMEA-EFPIA 2nd WORKSHOP ON ADAPTIVE DESIGN IN CONFIRMATORY TRIALS 2nd April 2009

EMEA
7 Westferry Circus, Canary Wharf, London E14 4HB – Meeting Room 2A

GENERAL INFORMATION

OBJECTIVES OF THE WORKSHOP

The potential to conduct clinical trials with an adaptive design has stimulated much excitement in the pharmaceutical industry, for both statisticians and non-statisticians alike. Considerable efforts have been made in academia, industry and regulatory circles in developing appropriate statistical and clinical trial methodology and in defining boundaries for the use of adaptive design in confirmatory trials.

The first EMEA-EFPIA workshop on adaptive design was aimed at gaining a common understanding of the usefulness and the limitations of confirmatory trials conducted with an adaptive design.

The second EMEA-EFPIA workshop will aim at addressing questions from the 1st workshop and at gaining a common understanding of what could be considered “Good Adaptive Practices”. Case studies will be used to introduce discussion on the key methodological issues and give industry, EU and US regulators the opportunity to share their views.

WHO SHOULD ATTEND THIS WORKSHOP?

The meeting is aimed at both statisticians and non-statisticians from the pharmaceutical industry and from regulatory agencies.

A basic understanding of clinical trial methodology will be assumed, but extensive knowledge of statistical methodology will not be necessary to follow the presentations and resulting discussions.

REGISTRATION

Participants are invited to use the attached registration form.

Registration forms must be received by 27th March 2009 at the latest.

ACCOMMODATION

Participants are invited to make their own arrangements. EFPIA will not arrange any hotel booking.
