Withdrawing *EQUITEND* application EMEA/V/C/002774/0000

Dear members of CVMP,

Following the acceptance on the 5-7 December 2018 by the committee to extend the timeframe for the submission of responses to listed question until December 2018. OTR3 has done its best efforts to generate new clinical data through a field trials as strongly recommended.

OTR3 did not succeed in raising the fund nor find partnership to perform this trial. Cost, recruitment difficulties inducing an expedited duration over several years and small size market size were as many obstacles.

Therefore OTR3 withdraws its application.

Yours sincerely
