MSP AG activity to date

Key priorities for Academia

Training/awareness: reduce **operational barriers** and increase **familiarity** with relevant regulatory and legislative requirements (i.e., the clinical trial regulation, CTIS, ICH E6).

Regulatory interactions: increase **regulatory interaction** with academic sponsors via early scientific advice and guidance during trial development.

Funding: need multi-national infrastructures, harmonization and appropriate **funding** schemes.

Risk/based approach: need for **flexible approaches** to support low risk intervention trials. Need to consider other types of protocols not necessary focussed on “new drugs”.

Any questions?
