

The Hospital Pharmacist in THE FUTURE in Oncology Clinical Trials

Regular Care and Clinical Trials:

Opening the Site Based on the existing quality system (JCI, JACIE)

PLEASE do not give me the same 2-hour obligatory training for every similar trial

Procurement and Ordering via the regular automated system of my hospital

NOT via the 94!! different portals that we now have to use, this will also enable automatic DDI screenings

Compounding same as in routine care: automated or at least gravimetric

PLEASE just give me the densities and stop asking for wet signatures

Documentation and Archiving same as in routine care

NO more paper or external portals
