## Organisational matters

### CHMP meeting 18-21 June 2012

The main organisational topics addressed during the June 2012 CHMP meeting related to:

- The election of Krishna Prasad as the Chair of the Pharmacogenomics Working Party
- The future of D:A:D Highly Active Antiretroviral Therapy (HAART) study. The Committee recognised its contribution to the European pharmacovigilance system and supported its continuation for another four years together with inclusion of further patients during this timeframe.

The CHMP welcomed Maja Lovrek and Anita Filipović Sučić from the Croatian Agency for Medicinal Products and Medical Devices who will be attending the meetings in order to become familiar with the Committee's working methods during the interim period preceding accession of Croatia to the European Union.
