*Ivo Claassen, EMA  
15:15-16:00*

**Closing remarks**

*Martin Harvey Allchurch, EMA / 16:00-16:15*

## About this event

This event is part of the European Commission funded Instrument for Pre-Accession Assistance (IPA) programme.

The main objective of this training is to prepare the integration of current candidate countries and potential candidates into the European Union regulatory systems by bringing them in closer alignment with the Acquis Communautaire in the field of medicines regulation.

## About the European medicines regulatory system and EMA

*The European medicines regulatory system* is based on a network of around 50 regulatory authorities from the 30 EEA countries (27 EU Member States plus Iceland, Liechtenstein and Norway), the European Commission and EMA. This network makes the EU regulatory system unique.

The network is supported by a pool of some four thousand experts drawn from across Europe, allowing it to source the best possible scientific expertise for the regulation of medicines in the EU and to provide scientific advice of the highest quality.

EMA and the Member States cooperate and share expertise in the assessment of new medicines and of new safety information. They also rely on each other for exchange of information in the regulation of medicines, for example regarding the reporting of side effects of medicines, the oversight of clinical trials and the conduct of inspections of medicines' manufacturers.

## Venue

European Medicines Agency  
Domenico Scarlattilaan 6  
1083 HS Amsterdam  
The Netherlands
