## Sixth Enpr-EMA workshop

[Enpr-EMA](#) (the European Network of Paediatric Research at the European Medicines Agency) is a network of research networks, investigators and centres with recognised expertise in performing clinical studies in children.

The sixth workshop of the European Network of Paediatric Research at the European Medicines Agency will take place on 26-27 June 2014 at the European Medicines Agency in London. Day one on the 26 June is an open meeting to all stakeholders: patient/parent organisations, network representatives, pharmaceutical industry staff responsible for paediatric studies and regulators. Day two on 27 June is dedicated to members of Enpr-EMA and its working groups.

Day one of the workshop aims at strengthening communication between all stakeholders. The EMA has organised a buffet lunch for all participants. Attendees are requested to pay £20 at the time of registration to contribute towards the cost.

Registration will open from 12 May until 13 June 2014. Expressions of interest can be sent in advanced to the Enpr-EMA mailbox [enprema@ema.europa.eu](mailto:enprema@ema.europa.eu)

Day two is devoted to reflect on the outcomes of day one, and to discuss and define priority tasks of the Coordinating Group and the Enpr-EMA Working Groups for the year 2014-2015.

This workshop provides an opportunity for representatives from regulatory authorities, industry, academia, clinical investigators and patient/parent organisations to be updated on the Enpr-EMA's efforts in fostering high quality paediatric drug research and to contribute to the further development of paediatric medicines research and clinical trials.
