

Union Product Database (UPD) release notes

Referring to version 1.6.20

Release date: 13 March 2023

Overview of key changes:

With every new release, the UPD release notes are updated to highlight to the user the changes compared to previous versions by detailing new/updated functionalities and/or issues that have been resolved, are known and/or are newly reported.

Compared to the previous UPD version (**1.6.16**, released on 30 January 2023), new functionalities (detailed information in section 2.1) are available and **60** defects (detailed information in section 2.2) have been considered resolved.

Overview of new functionality(ies):

- Variations not requiring assessment (VNRAs):
 - MAH and NCA can now search for submissions by applying one or more criteria (e.g. Permanent Identifier, Product Identifier, Product name, etc).
 - MAHs can select more than once the same VNRA scope within the same submission.
- Log-out:
 - A timer for UI users has been added, which is resetting to 60 minutes with each activity.
- Document upload:
 - It is now possible to upload in UPD large files of any type, (e.g. **Product Information**) up to 10 MB.

Important for NCA/EMA/EC users regarding the bulk upload functionality:

- Before using bulk upload functionality, please clear the browsing data ('Cookies', cached images, files and other site data) by pressing **Ctrl+Shift+Delete**. If not cleared, an error message "The upload of one or more documents failed" will pop-up.

For full, complete information please refer to section 2 of this document.

Table of Contents

1. Overview of functionality and business value	4
1.1. Functionality provided in this release	4
1.2. Functionality not included in this release	5
2. Changes made compared with 1.6.16	6
2.1. New or re-released functionality	6
2.2. Resolved issues	8
2.3. New known issues for functionality in previous release	17
2.4. Known issues for new functionality in this release	24
2.5. Known issues that have been collated into a new ticket	25
3. Veterinary EU Implementation Guide versions for this release	27
3.1. Providing Strength or Reference Strength for an Ingredient	27
4. NCA UI	28
4.1. Scope of this release for NCA UI	28
4.2. Apply Chapter 4 Legacy or Chapter 2 Validation rules	29
4.3. Workarounds required to Create or Update products	29
4.4. Registration process for access to the NCA UI in the UAT environment	30
4.5. Registration process for access to the NCA UI in production (PROD) environment	31
5. UPD API	32
5.1. Scope of this release for API	32
5.2. UPD API supported Product Service endpoints	32
5.3. API Manager product subscription	33
5.4. Apply Chapter 4 Legacy or Chapter 2 Validation rules	34
5.5. API EP309 Create, EP311 Update & Nullify product endpoints	34
5.5.1. Request headers applicable for all Create, Update & Nullify POST	34
5.5.2. Create and Update endpoints	34
5.5.3. Nullify endpoint	36
5.5.4. Response to POST for Create, Update or Nullify and use of Get OperationOutcome	37
5.5.5. Creating products for DCP or Update Common Data if national data is provided	38
5.5.6. Key changes in valid request bundle for create and update	38
5.5.7. API EP309 Create product example request bundles	38
5.5.8. Recommended approach to prepare update request bundle	41
5.5.9. How to use Update NP product endpoint and example bundle	42
5.5.10. How to use Update National Data DCP/MRP/SRP product endpoint and example bundle	42
5.5.11. How to use Update Common Data DCP/MRP/SRP product endpoint and example bundle	43
5.5.12. How to use Create MRP product endpoint and example bundle	44
5.5.13. How to use Create SRP product endpoint and example bundle	44
5.6. API Manage document	45
5.6.1. EP403 Create document	45
5.6.2. EP401 Search document	46
5.6.3. EP402 Get/retrieve document	47
5.6.4. EP404 Update document	48

5.6.5. Changes for Create and Update document payload	48
6. MAH UI	48
6.1. Scope of this release for MAH UI	48
6.2. Registration process for access to the MAH UI in production (PROD) environment.....	49
7. Known issues	50
8. User support.....	50
9. References	50

9.1. Request the Super User Role for your Organisation in UAT	51
9.2. Request a Member User Role for your Organisation and Affiliate to your Organisation in UAT	53
9.3. Request the Super User Role for your Organisation in Production	53
9.4. Request a Member User Role for your Organisation and Affiliate to your Organisation in Production	55
Annex 2: Known issues.....	56
Annex 3: Release Schedule.....	72

1. Overview of functionality and business value

1.1. Functionality provided in this release

- API:
 - RMS can create DCP products (data and documents)
 - RMS can create MRP products (data and documents)
 - RMS can create SRP products (data and documents)
 - RMS and CMS can complement DCP/MRP/SRP product with national DCP/MRP/SRP data and documents
 - RMS can update Common data for DCP/MRP/SRP product (data and documents)
 - NCA can create and update NAP products (data and documents)
 - NCA can create & update Registered Homeopathic products (data and documents)
 - NCA can create & update Parallel Trade products (data and documents)
 - NCA can Nullify product
 - Search/view product (data and documents)
- NCA UI:
 - RMS can create DCP products (data and documents)
 - RMS can create MRP products (data and documents)
 - RMS can create SRP products (data and documents)
 - RMS and CMS can complement DCP/MRP/SRP product with national DCP/MRP data (including documents)
 - RMS can update Common data for DCP/MRP/SRP product (data and documents)
 - NCA can create and update NAP products (data and documents)
 - NCA can create & update Registered Homeopathic products (data and documents)
 - NCA can create & update Parallel Trade products (data and documents)
 - NCA can Nullify product
 - NCA can Bulk Upload Documents
 - ~~NCA can Transfer Marketing Authorisation~~ Due to UPD-12726 this functionality cannot be used in this release
 - Search/view/export product (data and documents)
 - Notifications for Create and Update of products and OPAD actions
 - View Volume of Sales information
 - View and Approve/Reject VNRA submissions
 - EMA and EC staff can update CAP products
- MAH UI:

- Search/view/export product (data and documents)
- Notifications for Create and Update of products and OPAD actions
- Download, Submit and View Volume of Sales information
- Submit VNRA and View VNRA submissions
- Submit updates for Marketing authorisation status
- Download ~~and Submit updates~~ for Availability status
 - There are two issues affecting the submission of Availability status. UPD-13458 affecting products under DCP/MRP/SRP where RMS product is always incorrectly updated; and UPD-13635 affecting submission of updates CAP products. Only submission of Availability status for NAP product is possible in this release
- Authorisation for NCA & MAH UI:
 - Integration with EMA Account Management (EAM) system for CA and Industry (MAH) roles
 - CA users may search and view all Vet products
 - MAH users may search and view only products under the responsibility of the organisations the user represents

This release is based on FHIR version R5 Preview #2, <http://hl7.org/fhir/2020May/resourcelist.html>.

The sections below contain all required information to register for usage of the UI or API, connect to the API or UI and to use the available functionality.

More functionality and additional components will be made gradually available in next releases.

Technical grouping:

Please note that the Technical grouping functionality for VNRAs has been recently delivered to the production environment. This functionality involves a certain complexity, but the learning curve will be less steep if we can rely on the collaboration between all competent authorities (CAs) and marketing authorisation holders (MAHs). With this in mind, **we strongly recommend MAHs to only combine MRP/DCP and national VNRAs in such technical groupings, where only one RMS/NCA is responsible for the approval/reject action**. Combining several NCA is technically possible, but strongly discouraged as it would lead to great obstructions and severe delay in processing the VNRA's.

1.2. Functionality not included in this release

The following functionality is not included in this release.

NCA UI:

- Transfer Marketing Authorisation for products under any procedure: Due to UPD-12726 this functionality cannot be used in this release

MAH UI:

- Submit updates for Availability status: There are two issues affecting the submission of Availability status. UPD-13458 affecting products under DCP/MRP/SRP where RMS product is

always incorrectly updated; and UPD-13635 affecting submission of updates CAP products. Only submission of availability status for NAP product is possible in this release

2. Changes made compared with 1.6.16

2.1. New or re-released functionality

- UPD-BR-123 Variations not requiring assessment - enrichment of the form that allows MAH and NCA to search for submissions
- UPD-BR-166 Ability to select more than once the same VNRA (scope) within the same submission
- UPD-BR-169 Possibility to extend automatic log-out time for UI users, display of log-out time /timer that is running backwards and is reset at activity
- UPD-BR-191 Part 2 Maximum size allowed for individual UPD documents file to be increased
 - Product documents up to 10 MB may now be added
- Change ticket UPD-11012 UC09 Approve/Reject VNRA - When automated variation code impacts Common/European data then all products under Product Identifier are to be updated even if product not in submission
 - This change had been made in an earlier release but had not been documented in the release notes. Including it in these release notes as confirmation that this change has been implemented
- Change ticket UPD-11036 UC09 -Approval/Rejection of VNRAs impacting DCP/MRP/SRP - when RMS marks one of the "Approve/Reject" checkboxes, the system automatically populates the selection (marks the "missing" "Approve/Reject" checkboxes) for the remaining products under the same product identifier
 - This change had been made in an earlier release but had not been documented in the release notes. Including it in these release notes as confirmation that this change has been implemented
- Update CAP products (by EMA or EC staff)
- MAH are able to submit updates for Marketing authorisation status for CAP products

API users:

- Response to POST for Create/Update and format of ID in Content-Location Response Header UPD-6882
 - The post-operation part of the id used to have different values depending on the procedure type and whether the POST was a Create or Update
 - The post-operation value is now standardised and is always "OperationOutcome"
 - Therefore, the id in the Content-Location Response header can be used to submit a GET to the OperationOutcome endpoint without the need to parse the value to obtain the second part with the operation-outcome-id
 - Section 5.5.4. of the release notes has been updated
- Nullify endpoint and resolution of UPD-9773

- Validation based on chapter 2 rules was being applied when nullifying a product. This issue has been resolved and a Request header of chapter4=true to apply Legacy validation rules no longer needs to be provided. The nullification will still be successful if this Request header is included.
- When first implemented there was no Content-Location response header with OperationOutcome/ID. This has now been changed and Content-Location response header is populated with OperationOutcome/ID. GET OperationOutcome/ID can be used to review the status of the transaction to confirm the nullification has been successful. Please note that due to bug UPD-13659 a small delay is currently required before submission of the GET OperationOutcome
- POST in XML format is now supported
- Sections 5.5.3. and 5.5.4. of the release notes have been updated

2.2. Resolved issues

Issue reference is an internal number used by the UPD Project team when managing issues. It has been included as User Support may refer to this reference number when responding to your queries. In addition, you can include this reference number when contacting user support on this topic and seeking clarification.

This table is ordered by Vet EUIG Chapter 2 section; and then by Use Case number for those items without a specific IG reference.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
UC08 Update product	API	UPD-12747	1.9 (Pharmacovigilance System) Master File	API user only: Update National Data DCP/MRP/SRP where product has been loaded using Chapter 4/Legacy rules without PSMF: if the Update National Data payload has incorrectly included the addition of new PSMF information the update remained IN_PROGRESS. Since PSMF is Common Data, if PSMF is added as part of National Data update the values should be silently ignored and the update should complete successfully. This issue has been resolved and the Update National Data will successfully be completed.
UC01 Create product	NCA UI	UPD-10750	1.11 Attached Document	Create DCP UPD-UC01-AC202 - Only Common Documents where country is European Union (EU) and language is English should be output to the created products and any other documents will now be ignored
UC08 Update product	API & NCA UI	UPD-6927	2.5 Authorisation status	Update Common Data - when a CMS is removed from the list the Acceptance criteria has been updated and there will no longer be any update of the authorisation status in the removed CMS product
UC01 Create product	API	UPD-12240	2.12 Concerned member states	Create NAP/MRP/SRP via API – were able to create product with old country code 100000000556 (United Kingdom of Great Britain and Northern Ireland) as CMS and this will now reject with validation error
UC08 Update product	API	UPD-4734	4.2 Manufacturer	Change of manufacturer in an Ingredient resulted in no manufacturer being populated in the updated product for that Ingredient. New Manufacturer will now be saved as long as they have Manufacturing activity of "Manufacture of active substance"
UC08 Update product	API	UPD-5384	5.1 Package description	New Package description added to product is output in main package description attribute and not as a translation as expected.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
				<p>This issue has been closed as "Not an issue".</p> <p>We acknowledge the symptoms that there is a change of order between the business values for the descriptions but we do not consider this as a bug or an issue, since:</p> <ul style="list-style-type: none"> there is no indication in the Vet EU IG of which couple of description/language must be under the element description or under the element markdown, under the element description (PackagedProductDefinition.description); each couple description/language retains its inline id
UC01 Create product UC08 Update product	API	UPD-9836	5.3 Package identifier	Package: when adding a new package, if a value was populated for Package identifier this was the value that was being output in the new or updated product. This was incorrect as the Package Identifier should always be system generated for a new package. This issue has been resolved. If any value is populated the POST will be accepted without a validation error, and the input value is ignored and not used.
UC08 Update product	NCA UI	UPD-12734	5.6.4 Ingredient (in Manufacture d item)	If a product has more than one Ingredient referenced within a Manufactured Item, when product was edited there were no Ingredients listed in the summary table for that Manufactured item. If that Manufactured Item was edited only one of the Ingredients was listed.
All UC	NCA UI & MAH UI	UPD-12400		Search and View product screens and others: the Country term code sometimes displayed the expected short name and sometimes the full term name (e.g. Spain vs. Kingdom of Spain). The short name is now displayed for countries.
All UC	NCA UI & MAH UI	UPD-12084		There should be consistent display of the Marketing Authorisation Holder information across UPD screens with all address details displayed (street address, city, postcode, country). Some screens only displayed the organisation name or organisation name and street address

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
UC01 Create product	API	UPD-12923		API user only - Create DCP with XML payload - if there was a comment before an extension attribute there was a validation error "Unknown element 'fhir_comments' found during parse" (Regression)
UC01 Create product	NCA UI	UPD-13162		<p>Create Parallel Trade product: the list of Ingredients was incorrect when the Product retrieved as Source Member State has more than one Ingredient. The Substance code from one of the Ingredients was being output for all of the Ingredients in the new Parallel Trade product.</p> <p>For existing products that may have been affected by this bug we have logged bug UPD-13448 "DF Data Fix Parallel Trade - where Source Member State product had 2+ Ingredients as first one was duplicated in PTP product due to bug". EMA will investigate whether we can identify affected products and consider options of how these can be corrected.</p>
UC01 Create product	API & NCA UI	UPD-10475		Create SRP based on selecting one of the existing CMS products should not be possible. The RMS should select their own product as a basis for the Create SRP
UC01 Create product	NCA UI	UPD-13291		<p>Create SRP: if update an existing Common document with a new file, the new version is updated on the existing RMS & CMS products; but the new CMS product had the old version of that document.</p> <p>This issue has been resolved, therefore the suggested work-around is no longer required (do not update any existing Common Documents as part of a Create SRP; and instead update using an Update Common Data).</p>
UC01 Create product	API	UPD-10136		POST Create bundle for DCP where URI starts with https and not http - this will now reject with a validation error
UC01 Create product UC08 Update product	API	UPD-10133		POST Create or Update bundle for NP where URI starts with https and not http - this will now be rejected with a validation error.
UC01 Create product	API	UPD-10673		Post to the EP318 Validate end point for Create DCP displayed an incorrect validation error relating to Marketing Authorisation Number "Marketing Authorisation Number must be provided either on product level or for all packages."

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
UC01 Create product	API & NCA UI	UPD-11798		Products are created even though the transaction has failed and Operation Outcome shows there has been a timeout error. No Notification will have been created. This is expected to be an infrequent occurrence. This issue has been closed without making any change made as were not able to reproduce in this release.
UC01 Create product UC08 Update product	NCA UI	UPD-12914		When creating or updating a product and received some validation error, the package description and language disappeared and after correcting the first error then received a validation error that there was no package description. The only workaround was to either Edit each package and re-add a package description; or to refresh the screen and reapply the updates taking into account the first validation error that had been received. For updates this issue affected Update NAP and Update Common Data DCP/MRP/SRP; but was not an issue for Update National Data DCP/MRP/SRP. This issue has been resolved
UC03 Search product	NCA UI & MAH UI	UPD-12278		Active substance and strength column in Search table showed N/a instead of zero for products having substance strength or reference strength values as zero
UC03 Search product	NCA UI & MAH UI	UPD-13149		For DCP/MRP/SRP products, the product card on the search results page did not contain "Reference Member State" and "Concerned Member State" fields
UC03 Search product	NCA UI & MAH UI	UPD-10666		When searching for products may have received an error message "There has been a glitch". In most cases a resubmission of the search was successful and return products matching the submitted criteria. This issue had been resolved in a previous release but we had retained this as an open issue to asses if it was still an issue in PROD. There have been no occurrences in the last 2 release and therefore now closed.
UC03 Search product	NCA UI & MAH UI	UPD-11115		Sort of search results by alphabetical order of the product name did not work. This issue has been resolved.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
				Please note that in this release sorting of search results is only of those entries displayed on the current page. Requirement UPD-BR-160 is logged to implement sorting across all of the results and not just within the current page.
UC04 Export	NCA UI & MAH UI	UPD-9861		The downloaded csv file now contains all products matching the search criteria and previously only contained those displayed on the current page. There is a limit of 10,000 products that may be exported.
UC05 View product	NCA UI & MAH UI	UPD-12758		On the view product screen, documents with language of Norwegian or Icelandic displayed language as N/A
UC05 View product	NCA UI & MAH UI	UPD-12585		Reference Strength was not being displayed when viewing a product
UC05 View product	NCA UI & MAH UI	UPD-10956		The strength information was not displayed next to the Substance within an Ingredient
UC05 View product	NCA UI & MAH UI	UPD-12753		When viewing a product, the hyperlinks in the left hand menu to sections within the product data did not work
UC07 Submit Volume of Sales	MAH UI	UPD-12755		Submission of Volume of Sales - if any product name or package description contains an embedded quotation mark the submission failed with a validation error "invalid char between encapsulated token and delimiter"
UC08 Update product	NCA UI	UPD-9483		For product under DCP/MRP/SRP procedure, an NCA who is not the RMS or CMS was able to select to edit a product under the procedure. Only the RMS is now able to Update Common Data or Update National Data for any product under the procedure; and the CMS is able to only update National Data for their product
UC08 Update product	API	UPD-4714		If there are duplicate inline attribute IDs within a resource, the request will be rejected. The validation message will say that the resource is not included and is mandatory, with no other validation errors in the response. As a workaround, remove the existing inline ID from one attribute so there is no longer duplicate values. This may occur and most frequently affects:

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
				<ul style="list-style-type: none"> - MedicinalProductDefinition.contact - MedicinalProductDefinition.masterFile - AdministrableProductDefinition.routeOfAdministration - AdministrableProductDefinition.routeOfAdministration.targetSpecies - AdministrableProductDefinition.routeOfAdministration.targetSpecies.withdrawalPeriod <p>Changes have been made to the values for those inline attribute IDs that were causing the issue.</p>
UC08 Update product	NCA UI	UPD-12911		Impacted only EMA staff on Update CAP – incorrectly received a Validation error as wrong list ID had been used for Country for Product Name
UC08 Update product	NCA UI	UPD-9876		Transfer of ownership : it was possible to update the Product owner for a product where the logged in user is not affiliated to the Organisation that is the Responsible authority. There is now an error after submitting of "The user is not responsible for the product"
UC08 Update product	API	UPD-6882		UC08 Update SC2 Update National Data for DCP/MRP/SRP. The Content location in the response is in the format: national-data-operation-outcome/e915f652-d3b9-4cca-8c4d-23f0aae5a19a-ND. The id value should be output with as OperationOutcome/Id so that it can be submitted without needed to edit to the GET OperationOutcome Endpoint. Refer to section 5.5.4. for details.
UC08 Update product	NCA UI	UPD-11218		Update National data and after entering what is believed to be all national data, the Update button was not enabled (Package data is not displayed which is likely to be the underlying issue) (intermittent issue)
UC08 Update product	API	UPD-12224		Update Common Data DCP/MRP/SRP where RMS product does not have National data populated: POST had response code of 500 Internal server error. If Authorisation status and Date of Authorisation status change date attributes were populated the POST is successful. This was a regression issue and update common data should not require these attributes to be populated if RMS has not populated national data for their product.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
				This issue has been resolved and the workaround no longer needs to be applied.
UC08 Update product	NCA UI	UPD-12393		Update Common Data MRP/DCP/SRP - Delete Common Document only deleted the document from RMS product and did not delete from CMS products. This issue has been resolved.
UC08 Update product	API & NCA UI	UPD-12907		Update Common Data DCP/MRP/SRP - failed with DQ-Error-001 displayed incorrectly or a timeout and Update Common Data was blocked. This did not occur for all products and was only for those with many CMS, or where there had been many previous updates that had resulted in more than 50 Notifications for the Product Identifier
UC08 Update product	NCA UI	UPD-11292		Update National Data DCP/MRP/SRP: User was not able to edit or delete an existing or new national name before submitting the update
UC08 Update product	NCA UI	UPD-10388		Issue affected EMA/EC only: after an Update of a CAP some attributes were duplicated. This issue has been resolved and Update of CAP via NCA UI is now possible for those products with structured data for Substance strength and Reference Strength. An update for CAP products with only free-text for Substance strength is not possible in this release.
UC09 Approve VNRA UC28 View VNRA	NCA UI & MAH UI	UPD-12386		Where a product has been nullified after a VNRA has been submitted, when the NCA approved an automated variation code the nullified product was being updated and it should not have been. In addition when viewing the submission or VNRA PDF the nullified product was listed with product details. This issue has been resolved and nullified products are no longer displayed when NCA or MAH view the submission. Instead there will be a message advising that the product is now nullified. No updates are made to nullified products when automated variation codes are approved.
UC09 Approve/Reject VNRA	NCA UI	UPD-12930		If approving an automated variation code for product that had been loaded using Chapter 4/Legacy rules there was a validation error displayed and the VNRA could not be approved. This was because Chapter 2 validation rules were being applied instead of Chapter 4 validation rules. These VNRA will now be able to be Approved.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
UC19 Nullify product	API	UPD-9773		Implementation of endpoint to nullify a product was not as expected: didn't expect to have to specify which Validation rules to apply; there was no Content Location with OperationOutcome ID; format of errors when POST were not in the format specified in request Accept header; did not support request in XML format. These issues have all been resolved. Please refer to sections 2.1. 5.5.3. and 5.5.4.
UC19 Nullify product	API	UPD-11204		Response when submit POST to nullify a product has been reviewed: there was no message returned in response body; nullify endpoint is now aligned with other create/update endpoints and provides an OperationOutcome ID that can be used to query outcome. This was a duplicate ticket to UPD-9773. Please refer to sections 2.1. 5.5.3. and 5.5.4.
UC19 Nullify product	NCA UI	UPD-10910		Nullify Registered Homeopathic – were not able to nullify as received error when submitted "there was an error when trying to nullificate the product" (regression)
UC21 Manage Notifications	NCA UI & MAH UI	UPD-12405		Returning to search results in the notifications screen displayed the previously selected search criteria, but the notifications displayed were the default to display when first selecting notifications from the menu and had not applied the selected search criteria. This issue has been resolved and returning back to search results for notifications will display those matching the selection criteria
UC24 Marketing authorisation status	MAH UI	UPD-10751		Availability status was not updated to "Not marketed" when Authorisation status was updated to Suspended or Revoked
UC25 Update Availability status	MAH UI	UPD-12751		Download failed with a validation error if any product that had been selected to download has Authorisation status of Suspended, Revoked, Surrendered or Expired. Download will now be possible for these Authorisation status values.
UC25 Update Availability status	MAH UI	UPD-11130		If there are errors when submitting file for Availability status updates, the Error report file had incorrect values for "Pack size_Unit of presentation identifier" and Marketing Authorisation Number

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
UC25 Update Availability status	MAH UI	UPD-12755		Submission of Availability Status - if any product name or package description contains an embedded quotation mark the submission failed with a validation error "invalid char between encapsulated token and delimiter"
UC25 Update Availability status	MAH UI	UPD-12752		Submission of Availability status file: there were validations being applied for some columns of the submission file that shouldn't happen and caused the submission to fail
UC25 Update Availability status	MAH UI	UPD-11420		When submitted Availability status and the logged on MAH is not affiliated to the Product owner of the product, an incorrect error message was being displayed. "ERR.05 Package identifier provided doesn't belong to the country selected" was being displayed and it is now the correct error of "ERR.01: Package Identifier provided doesn't belong to a product under the User's responsibility".
UC27 View Volume of Sales	MAH UI	UPD-12423		View Volume of Sales for a Product that has had Volume of sales successfully submitted. After selecting product and sales period and submit this failed with an error 499 (issue was in PROD env only)
UC28 View VNRA	NCA UI & MAH UI	UPD-12885		MAH has submitted VNRA for variation code "A4 Change in ATCVet code" for two or more products, where the products do not have the same existing ATC Vet Codes. When NCA or MAH viewed the VNRA submission the field "A4-ATC-VetCodeCurrent" for each product did not display the correct data. The existing values from one of the products was being displayed for all products.
UC28 View VNRA	NCA UI	UPD-12942		NCA BVL in Germany only affected: Some VNRA submitted prior to HF 1.6.13-8 release - BVL still did not see all expected submissions. We now expect BVL to be able to view all expected submissions.
UC28 View VNRA	NCA UI & MAH UI	UPD-12522		The PDF for VNRA for variation Code A4 ATC Vet code was displaying the RMS Term code for the current and proposed ATC Vet codes. It is now displaying the RMS Term name as displayed on the View VNRA Submission page.
UC28 View VNRA	NCA UI & MAH UI	UPD-11888		View VNRA submission: The VneeS file was empty when viewing submission even although the MAH had attached a zip file that contains file(s) while submitting the VNRA. This infrequently occurred.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue that has been resolved
				We were unable to reproduce this error in this release and there have been no recent examples of this occurring in PROD.
UC28 View VNRA	NCA UI & MAH UI	UPD-12047		VNRA PDF: Current and proposed values for MAH are only printed for variation code A.1.a
UC34 Bulk Upload for Documents	NCA UI	UPD-11418		Document uploaded with Type = "epar" is being wrongly saved as "puar" This issue will not be fixed as EMA will no longer be loading legacy documents with document type of epar.
UC34 Bulk Upload for Documents	NCA UI	UPD-13300		Bulk upload was adding a new document when there already existed a document for the same combination of type, language and country. This issue has been resolved and the existing document will be updated

2.3. New known issues for functionality in previous release

This table is ordered by Vet EUIG Chapter 2 section; and then by Use Case number for those items without a specific IG reference. This section lists known issues in this release that have not previously been included in the Release Notes. Some issues had existed in a previous release, and some are new issues in this new release.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	New Issue description
All UC	NCA UI & MAH UI	UPD-13297	2.5 Authorisation status	CAP products - some products with status of Withdrawn or Surrendered have been loaded into UPD from EMA's source system (SIAMED) with status of Valid
All UC	API & NCA UI	UPD-13623		OMS to UPD updates: New or Updated Organisations and Locations from OMS are not available in UPD
Data fix	NCA UI & MAH UI	UPD-13448		Data Fix Parallel Trade products: where Source Member State product had two or more Ingredients, the first Ingredient from that product was duplicated in the new Parallel trade product. This was due to bug UPD-13162. EMA to query existing Parallel Trade products to identify products that were affected by this issue and then assess how to correct

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	New Issue description
UC01 Create product	NCA UI	UPD-13465		All procedure types: when adding second Ingredient, the Reference strength "Unit of measurement" drop-down list does not display list of terms so select a value. Second ingredient must first be added and then select Edit to be able to select required Unit of Measurement term
UC01 Create product	API	UPD-13501		All procedure types: Error message of "Failed to generate snapshot" may occur for one or more products in the GET OperationOutcome response. That product will not have been created
UC01 Create product	API & NCA UI	UPD-13702		Create MRP - not able to create MRP from NAP where Marketing Authorisation number is populated at Package Level. The submission of the Create MRP is successful but the transaction does not complete successfully
UC01 Create product	NCA UI	UPD-13523		Create SRP where RMS product has National document: the National document for the RMS product is being added for the new CMS products and should only be Common Documents
UC01 Create product UC08 Update product	API	UPD-13485		Create or Update of NAP - there should be a validation error if payload does not have Legal Status of Supply at either Product or Package level. At present the product is incorrectly being created/updated. Once this issue is resolved we will identify products that do not have Legal status of supply populated so that they can be corrected
UC01 Create product UC08 Update product	NCA UI	UPD-13632		If product contains two or more Pharmaceutical products, the labels are not properly formatted on the View product screen. The case where two or more Pharmaceutical products should link to the same Ingredient to be considered and review documentation. An Ingredient may only be linked to one Pharmaceutical product in this release
UC03 Search product	MAH UI	UPD-12230		If search products filtering by Product owner for Location that MAH user is not affiliated to - Error 403 Permission denied message is displayed instead of expected "Results not found"
UC03 Search product	NCA UI & MAH UI	UPD-13463		The "Active substance and strength column" is including Ingredients that do not have role of "Active". Only Active Ingredients should have details included in this column

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	New Issue description
UC03 Search product	API	UPD-13658		API user only: A search of products using two parameters of _lastUpdated: the second parameter is ignored and only the first is applied
UC03 Search product UC05 View Product	API & NCA UI & MAH UI	UPD-13461		The 'Organisation Name' from OMS is not always displayed for a Product Owner on the Search and View Product screens
UC05 View product	NCA UI & MAH UI	UPD-13324		CAP products - some products do not have any Substance name displayed. This issue affects only a few products
UC05 View product	NCA UI	UPD-13441		NCA User affiliated to both PEI & BVL does not have Edit Buttons as expected
UC05 View product	NCA UI & MAH UI	UPD-13494		Pharmaceutical products section: Withdrawal period information is not being listed beside the correct Target species
UC05 View product	NCA UI & MAH UI	UPD-13510		View product which has PSMF populated: PSMF Address is not displayed and has N/A
UC05 View product	NCA UI & MAH UI	UPD-13631		When view previous version for a product it displays manufacturer for Ingredient based on the current version of the product; and not the value that existed in that version
UC05 View product	NCA UI & MAH UI	UPD-13628		Package information is not displaying Manufactured item information
UC06 Submit VNRA	MAH UI	UPD-13634		If submit VNRA for an automated variation code for a product that has Marketing authorisation number populated at package level there is a validation error "Unable to find matching profile for PackagedProductDefinition/" displayed and not able to submit VNRA as expected. Further investigation is required as this issue has only been observed in Production and have not been able to reproduce in UAT
UC06 Submit VNRA	MAH UI	UPD-13483		When submitting VNRA there may be a timeout error message displayed. Further investigation is required to understand why this issue occurs and may be related to the number of organisations an MAH user is affiliated to or the size of the VNeS PDF
UC06 Submit VNRA	MAH UI	UPD-13778		When submitting VNRA and error is displayed of "System error: try again in a few minutes": on some occasions the message may be misleading as the Submission has been successful and is available with Submission ID. Therefore, duplicate submissions may be inadvertently created if

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	New Issue description
				submission had been retried. If system error is received on submission we recommend that a search is made of Pending VNRA before retrying in case the first submission had been successful.
UC06 Submit VNRA	MAH UI	UPD-13808		VNRA submission for variation code A.1.a : when MAH searches for the proposed MAH and selects a different LOC-ID to the existing LOC-ID from their own Organisation, after clicking Accept the selected location is not displayed in the VNRA Submission screen and therefore the VNRA can't be submitted. If the existing LOC-ID is selected as the proposed MAH LOC-ID this will be successfully displayed in VNRA submission screen and the VNRA can be submitted. It is not known whether this will affect all MAH as when reproducing in UAT it has not affected all test user accounts.
UC07 Submit Volume of Sales	MAH UI	UPD-13467		Submission of Volume of Sales - validation is missing for ERR.02 (product status is Current or Provisional) & ERR.15 (Species Split should be between zero and 100)
UC07 Submit Volume of Sales	MAH UI	UPD-13794		Volume of Sales Download list of Packages - the csv file is missing a column for "Comment" data. If file is used to prepare a submission file without populating the missing column there will be a validation error on submission "ER.04: The number of columns provided is not correct"
UC08 Update product	NCA UI	UPD-13466		If product name has been incorrectly duplicated for a language/country and you edit the product to remove one of the duplicated names, the updated product still contains both product names
UC08 Update product	NCA UI	UPD-13334		UC08 Update CAP - not able to add multiple Public Assessment Report documents. As a workaround from release 1.6.20 are able to use Bulk Upload to load multiple PuAR documents for a CAP product (as long as each document has a unique filename)
UC08 Update product	NCA UI	UPD-13454		Update Common Data and Update National Data DCP/MRP/SRP: the edit screen displays a warning message at the top advising of Pending VNRA submissions for the product. The same warning message should also be included in the confirmation dialog after clicking the Update product button

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	New Issue description
UC08 Update product	NCA UI	UPD-13495		Update Common Data DCP/MRP/SRP and remove a Common Document: a Notification for action of "Delete Document" is only being created for the RMS product and not for each of the CMS products. The RMS and CMS products have been correctly updated and the common document removed.
UC08 Update product	API	UPD-10607		Update Common Data DCP/MRP/SRP by API only - not all expected Validation errors are displayed if Mandatory attributes are not populated in POST for Update Common
UC08 Update product	NCA UI	UPD-13335		Update DCP/MRP/SRP Common data - It is possible remove a Manufactured item that is still referenced from a Package and this should not be allowed
UC08 Update product	NCA UI	UPD-13486		Update National Data DCP/MRP/SRP - a CMS is able to delete a Package and this should not be possible. If they do proceed to update only the CMS product is updated but is now not aligned with RMS and other CMS products
UC08 Update product	NCA UI	UPD-13484		Update National Data DCP/MRP/SRP - if strength has a numerator of zero, there is an incorrect validation error when attempting to update the product
UC08 Update product	API & NCA UI	UPD-13791		Update National Data DCP/MRP/SRP - not able to update National Data when Marketing Authorisation number provided at package level. There is a validation error
UC08 Update product	API & NCA UI	UPD-13296		Update of product fails leaving product in Pending state and this blocks and subsequent update
UC08 Update product	API & NCA UI	UPD-12385		Update of product fails with error in GET OperationOutcome of ERR-1003. An error from previous failed update with an incorrect payload prevents a subsequent update
UC08 Update product	NCA UI	UPD-13430		Update package where pack size has not been populated: an incorrect validation error related to pack size is being displayed and therefore this prevents any update to the package. This affects NAP and also Update of National Data DCP/MRP/SRP to edit national package description
UC09 Approve/Reject VNRA	NCA UI	UPD-13497		Where VNRA submission contains two or more Variation codes, and the NCA approves each variation in a separate submission: when the second and subsequent variations are being approved a "VNRA approved" notification is also being created for the variation codes that had already been approved.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	New Issue description
UC09 Approve/Reject VNRA	NCA UI	UPD-13793		If VNRA submission contains a product that has been nullified after the VNRA was submitted - the Decision comment entered at submission level is not being replicated into all product cards. Those product cards listed in the submission below the nullified product may not have had the decision comment populated and the field at product card level will need to be populated
UC19 Nullify product	API	UPD-13659		After successful POST of nullification, the initial response to GET OperationOutcome/ID is 404 not found. Subsequent GET are OK and show the status of the nullification transaction. This is not an issue for any of the Create or Update POSTs. As a workaround, a delay of few seconds should be included prior to submission of the first GET OperationOutcome, or handle response of 404 not found and resubmit
UC21 Manage Notifications	NCA UI & MAH UI	UPD-13656		Search of notifications with filter of "VNRA Rejected" and Authorisation Country "Romania" displays a system error. This is the only Authorisation country that displays an error for Action of "VNRA Rejected". Filtering by just "VNRA Rejected" or "Romania" does list notifications
UC21 Manage notifications	MAH UI	UPD-13676		MAH user who is not the Product owner may be able to view notifications for VNRA Approved and VNRA Rejected for a VNRA Submission for another Product owner. The MAH who is not the product owner is not able to view the VNRA Submission or the product
UC21 Manage Notifications	NCA UI	UPD-13811		Notification for VNRA actions Submitted/Approved/Rejected for a NAP product should not be visible for an NCA who is not the Responsible Authority
UC25 Update Availability status	MAH UI	UPD-13491		After searching for products, selecting products and download file: when click on the Reset button any search criteria in Product name and Permanent Identifier fields is not being cleared
UC25 Update Availability status	MAH UI	UPD-13487		Download product data file and select all products from several pages may result in a timeout error
UC25 Update Availability status	MAH UI	UPD-13458		Submission of Availability status for CMS product under DCP/MRP/SRP is incorrectly updating the RMS product with the new availability status and not the CMS product specified in the csv file. Therefore we recommend not to submit any updates for Availability status in this release although

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	New Issue description
				updates for NAP is not affected by this issue. This issue is expected to be resolved in 1.6.22
UC25 Update Availability status	MAH UI	UPD-13481		When select to download file the search products grid has an incorrect column heading for "Marketing authorisation status". Column heading is currently "Marketing status"
UC27 View Volume of Sales	MAH UI	UPD-13321		View Submissions of volume of sales - clicking the Reset button doesn't clear the search results table of previous search results
UC27 View Volume of Sales	NCA UI & MAH UI	UPD-13796		When download file to view submitted Volume of sales for a product, the downloaded csv file has not populated the column for "Creation date of product"
UC28 View VNRA	NCA UI	UPD-13452		When NCA views a VNRA submission where one of more products in that submission were included in some other submission: the warning message listing pending VNRA is now incorrectly including submission ID that have been approved or rejected. It should only be listing pending VNRA
UC28 View VNRA	NCA UI & MAH UI	UPD-13320		When View submission page, Download PDF, or View a Submission - timeout error is received. Some changes had been in PROD 7/02/23 but issue may still occur. The issue seems to occur for submission with many products and variatin codes (and thus the size of the submission), or may be related to the number of organisations an MAH is affiliated to. Further investigations are ongoing
UC28 View VNRA	NCA UI	UPD-13717		For a VNRA submitted for a product where the Responsible Authority is not correctly populated (for example may have incorrectly been populated with MAH LOC-ID): an NCA User for that Authorisation country is not able to view the VNRA Submission even after the Responsible Authority has been corrected in the product(s) included in the submission
UC34 Bulk Upload for Documents	NCA UI	UPD-13642		CAP product only for Document type PuAR: if PDF filename is the same as an existing document for PuAR there will be two documents show but both will have content of the most recent document that was loaded for that filename
UC34 Bulk Upload for Documents	NCA UI	UPD-13298		Documents have been successfully added to the product but a Notification has not been created for each of the documents that were successfully loaded
UC34 Bulk Upload for Documents	NCA UI	UPD-13641		Validation is not being applied when there are two or more documents in the same submission for a product for same

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	New Issue description
				Document type/Country/Language. Except for document type PuAR for a CAP product, it should not be possible for a product to have more than one document for combination of Document type/Country/Language
UC34 Bulk Upload for Documents	NCA UI	UPD-13677		Bulk Upload is not accepting file for document type pllab

2.4. Known issues for new functionality in this release

This table is ordered by Vet EUIG Chapter 2 section; and then by Use Case number for those items without a specific IG reference.

New functionality	Use Case	Affects API and/or UI	Issue reference	New Issue description
UPD-BR-191 Part 2	UC08 Update product	NCA UI	UPD-13678	All procedure types: it is not possible to update an existing document and upload a document with size > 2MB
UPD-BR-123	UC28 View VNRA	NCA UI & MAH UI	UPD-13779	If submit a search using Product name as search criteria (either default of starts with or select contains) and view a submission from search results: when you return to the search results screen the search field includes a suffix of "&productNameContains". This suffix will need to be removed from the end of the product name in order to be able to submit a subsequent search using that same name
UPD-BR-123	UC28 View VNRA	NCA UI & MAH UI	UPD-13673	New search criteria of date displays the date in the wrong format. Displays as mm-dd-yyyy instead of dd-mm-yyyy. The value specified is correctly applied when searching and the search results do match the selected date(s)

New functionality	Use Case	Affects API and/or UI	Issue reference	New Issue description
UPD-BR-123	UC28 View VNRA	NCA UI & MAH UI	UPD-13812	When selecting "View VNRA Submissions" from the menu, or enter some search criteria and Submit: there may be a timeout error displayed. This does not happen for all users and to-date has only been observed for some MAH. As a workaround enter additional search criteria to reduce the number of search results to be returned.
UPD-BR-123	UC28 View VNRA	NCA UI & MAH UI	UPD-13805	Where submission search results are listed on 2 or more pages (based on the number of records per page that has been selected) and user views a submission from page 2 or some subsequent page: when select "Back to search results" the first page of search results is displayed and not the page the user had been viewing. If any search criteria had been entered these are retained and the search results displayed are based on that criteria
UPD-BR-169	UC39 UPD Usability aspects	NCA UI & MAH UI	UPD-13270	The expected warning message when 5 minutes of active session are left is not displayed

2.5. Known issues that have been collated into a new ticket

The following existing known issues related to search functionality have been reviewed and grouped together in a new ticket. The new ticket is UPD-12748 and the individual tickets have been closed.

Use Case	Affects API and/or UI	Issue reference	Vet EUIG Chapter 2 section	Issue description
All UC	NCA UI & MAH UI	UPD-9862		<p>All search result tables/grids - sorting search results should apply the sort across all entries matching the search criteria and not just sort the current page of search results.</p> <p>This limitation has been included to be resolved as part of the post go-live requirement UPD-BR-160 "Improve navigation in search results"</p>
UC03 Search product	API & NCA UI & MAH UI	UPD-1024		Search should be accent insensitive when using the exact modifier and it is not

3. Veterinary EU Implementation Guide versions for this release

This UPD release is based on the following Vet EU IG versions:

- Chapter 2 – May 2022
- Chapter 4 - July 2021
- Chapter 6 - (Examples for the submission of Legacy data) December 2021
- Chapter 7 - (Submission of OPAD data) May 2022
- All other chapters based on May 2021

3.1. Providing Strength or Reference Strength for an Ingredient

The following is an explanation of the workaround that is recommended to be used for issue UPD-7228

UC01 Create & UC08 Update Product – this should be valid where Reference Strength is populated but there is no Substance Strength; or if specify Substance Strength a Reference Substance and no Reference Substance Strength. Instead, there is a validation error and Substance Strength must always be specified. In addition, if you add a Reference Substance you must always add a Reference Substance Strength.

The following table illustrates the possible combinations that should be valid and a workaround to use until this issue is resolved.

- Green tick ✓ indicates this combination is working in this release
- Red tick ✗ indicates this combination should be valid but is not working in this release.

The values in the Substance, Substance Strength, Reference Substance and Reference Substance Strength illustrate what values should be populated as a recommendation until this issue is resolved.

	(Active/Adjuvant) Substance	Substance Strength	Reference Substance	Ref. Substance Strength	Example in SPC	Working	Work around
1	✓ Amoxicillin 3H2O	✓ 300 mg/tablet			Amoxicillin 3H2O 300 mg/tablet	Yes	
2	Amoxicillin	500 mg/tablet	✓	✓	Amoxicillin 500 mg/tablet	No and not able to resolve as this is a FHIR requirement to always have substance specified	Report as substance
3	✓ Amoxicillin	500 mg/tablet	✓	✓	Amoxicillin 3H2O expressed as amoxicillin 500 mg/tablet	No – bug to fix UPD-7228	Recommendation: Report the reference substance as substance.
4	✓ Amoxicillin 3H2O	✓ 300 mg/tablet	✓		Amoxicillin 3H2O 300 mg/tablet expressed as amoxicillin	No and not able to resolve as it is a FHIR requirement to always have Reference Strength if Reference Substance is specified	Recommendation: just report the substance + strength and do not report Ref Substance
5	✓ Amoxicillin 3H2O	✓ 300 mg/tablet	✓ Amoxicillin	✓ 500 mg/tablet	Amoxicillin 3H2O 300 mg/tablet expressed as amoxicillin 500 mg/tablet	Yes	

4. NCA UI

4.1. Scope of this release for NCA UI

- UC01 Create Product via UI
 - Scenario 1 Create Product – NAP & Registered Homeopathic – Manual Key In
 - Scenario 2 Create Product – Decentralised Procedure – Manual Key In
 - Scenario 3 Create Product – MRP & SRP
 - Scenario 4 Create Product – Parallel Trade
 - Scenario 5 Cancel Create Product
 - Able to create products based on Chapter 4 Legacy or Chapter 2 Validation rules
- UPD UC03 Search Product via UI
- UPD UC04 Export search results
- UPD UC05 View Product via UI

- UPD UC08 Update Product via UI
 - ~~Scenario 1 Transfer of ownership~~ Due to UPD-12726 this functionality is not able to be used in this release for any products
 - Scenario 2 Update a single Product – Common & National data for CAP, NP & Registered Homeopathic and National data for DC/MR/SR procedures (data and documents)
 - Scenario 3 Update Common Data for products under DCP/MRP/SRP (data and documents)
 - Scenario 4 Update Parallel Trade
 - Scenario 5 Cancel Update Product
 - Able to update products based on Chapter 4 Legacy or Chapter 2 Validation rules
- UPD UC19 Nullify Product
- UPD UC21 Manage Notifications via UI
 - The flags for “Show only products under my responsibility” and “Exclude products where my role is RMS” are not in scope for this release and are not implemented
- UPD UC34 Bulk Upload of Documents
- UPD UC27 View Submissions of Volume Sales via Form
 - Scenario 1 and 3 – View and Download Volume of Sales as a CA or MAH
- UC28 View Variation not Requiring assessment via UI
- UC09 Approve/Reject Variation Not Requiring Assessment via UI

Supported browsers for the NCA UI are Chrome and Edge.

4.2. Apply Chapter 4 Legacy or Chapter 2 Validation rules

There is a flag on the top right of the Create and Update screens. This is used to indicate which validation rules are to be applied for this product.

When you select to Create from the menu or select to edit a product the flag is enabled with the message “**Enabled to create a legacy product following specifications of Vet EU IG Chapter 4**”.

Click the button to toggle to use Chapter 2 validation rules.

4.3. Workarounds required to Create or Update products

There are some workarounds that are required in this release when creating products.

Issue reference	Vet EUIG Chapter 2 section	Issue and Workaround
UPD-4863	5.6.4 Ingredient (in Manufactured item)	This should not be mandatory for Legacy products. An ingredient must be selected in this release for create of a NAP product. It is no longer mandatory for a DCP.

4.4. Registration process for access to the NCA UI in the UAT environment

To request access:

- If you do not already have an EMA account in the Test environment:
 - EAM-Test can be found at: <https://register-test.ema.europa.eu/identityiq/login.jsf>
 - *Create a new EMA account* Reference guide: <https://register-test.ema.europa.eu/identityiq/help/selfregister.html> (note: links in the documentation are for the production environment)
- Log into EAM-Test once registration is complete to Request Access to one of the UPD NCA UI roles
 - select *Request Access for Organizations*. Reference guide: <https://register-test.ema.europa.eu/identityiq/help/requestaccess.html>
 - choose your country and Organization ID.
 - use "UPD" as a search option to filter available roles
 - select appropriate role:
 - **UPD CA Super User (reminder: attach document** as evidence of your authority to manage users for your organisation)
 - **UPD CA Edit Search View**
 - **UPD CA Search View**
- Some UPD-specific screenshots can be found in Annex 1.
- The request for the first "UPD CA Super User" for your organisation will be approved by EMA. Access is only being granted to NCA staff.
- The approved "UPD CA Super User" will manage all other access requests for your organisation.
- Once registered, the UI in UAT can be found at:

[Union product database \(upd-portal-uat.azurewebsites.net\)](https://union-product-database-upd-portal-uat.azurewebsites.net)

If you have questions or encounter issues, contact the VMP-Reg User Support via <https://servicedesk.ema.europa.eu/jira/servicedesk/customer/portal/283/group/506>.

4.5. Registration process for access to the NCA UI in production (PROD) environment

We strongly recommend that before you request access to the UPD PROD environment, you have:

- Participated (viewed recording) in the training/demo on how to submit legacy data in UPD of 4 August 2021
- Carried out some testing in the UAT environment compliant with the latest version of the EU Implementation Guide.

To request access:

- If you do not already have an EMA account in the Production environment:
 - EAM Production can be found at: <https://register.ema.europa.eu/identityiq/login.jsf>
 - *Create a new EMA account* Reference guide: <https://register.ema.europa.eu/identityiq/help/selfregister.html>
- Log into EAM Production once registration is complete to Request Access to one of the UPD NCA UI roles
 - select *Request Access for Organizations*. Reference guide: <https://register.ema.europa.eu/identityiq/help/requestaccess.html>
 - choose your country and Organization ID.
 - use “UPD” as a search option to filter available roles
 - select appropriate role:
 - **UPD CA Super User (reminder: attach Nomination document as evidence of your authority to manage users for your organisation)**
 - **UPD CA Edit Search View**
 - **UPD CA Search View**
- Some UPD-specific screenshots can be found in Annex 1.
- The request for the first “UPD CA Super User” for your organisation will be approved by EMA. Access is only being granted to NCA staff.
- The approved “UPD CA Super User” will manage all other access requests for your organisation.
- Once registered, the UI in PROD can be found at:
[Union product database \(upd-portal-prod.azurewebsites.net\)](https://union-product-database-prod.azurewebsites.net)

If you have questions or encounter issues, contact the VMP-Reg User Support via <https://servicedesk.ema.europa.eu/jira/servicedesk/customer/portal/283/group/506>.

5. UPD API

5.1. Scope of this release for API

- Create DCP based on Chapter 4 Legacy or Chapter 2 rules
- Create MRP based on Chapter 4 Legacy or Chapter 2 rules
- Create SRP based on Chapter 4 Legacy or Chapter 2 rules
- RMS can update Common Data for products under DCP/MRP/SRP (data and documents)
- RMS and CMS can complement DCP/MRP/SRP product with national data
- Create NP & Registered Homeopathic based on Chapter 4 Legacy or Chapter 2 rules
- Update NP & Registered Homeopathic product based on Chapter 4 Legacy or Chapter 2 rules
 - Edit existing, add new, or delete an existing non-mandatory attribute
 - Add new resources. For example: add an Ingredient or add another Package
 - Delete an existing non-mandatory resource. For example: remove an Ingredient
- Create & Update Parallel trade based on Chapter 4 Legacy or Chapter 2 rules
- Search and retrieve products
- Nullify product
- Upload, search, retrieve, and update Documents (for product under any procedure type)

5.2. UPD API supported Product Service endpoints

EP302 Search Product Part and EP305 Get Product Part endpoints are no longer available.

SPOR API Specification v2	API Manager
EP301 Search Product	GET MedicinalProductDefinition - Search for a MedicinalProductDefinition resource or resources
EP303 Get Product	GET MedicinalProductDefinition - Get a MedicinalProductDefinition ID
EP304 Get Product Full	GET Everything Current - Get \$everything for a MedicinalProductDefinition ID
EP306 Get Product Version	GET MedicinalProductDefinition Version - Get version of MedicinalProductDefinition ID
EP306a Get Product Version Full	GET Everything Versioned - Get \$everything for a version of MedicinalProductDefinition ID
EP307 Get Product Versions	GET MedicinalProductDefinition - Get history of MedicinalProductDefinition ID

SPOR API Specification v2	API Manager
EP309 Create Product	NAP: POST Bundle - Create/Update resources in the bundle DCP: POST dcp-bundle - Submit a Create DCP payload MRP: POST mrp_bundle – Submit a Create MRP payload SRP: POST srp_bundle – Submit a Create SRP payload Refer to 5.5.2. Create and Update endpoints
EP309 Create Product EP311 Update Product for use with any Create or Update	GET OperationOutcome - Get a resource by ID Note: use this to query the outcome of Create or Update when response to Post is "202 Accepted"
EP311 Update Product	NAP: POST Bundle - Create/Update resources in the bundle Update National Data: POST /upd/api/v1/national-data-bundle/ - Submit an Update National Data payload for DCP/MRP/SRP products Update Common Data: POST /upd/api/v1/common-data-bundle/ - Submit an Update Common Data payload for DCP/MRP/SRP products
EP318 Validate Product	POST Validate Bundle – To validate a bundle and the resources in the bundle Used for all procedure types; for both chapter 2 or legacy validation rules; and for both Create & Update
EP UC19 Nullify Product	POST /upd/api/v1/vmp-nullification/
EP401 Search document	GET DocumentReference - Search for DocumentReference No
EP402 Get/Retrieve document by Id	GET DocumentReference - Get a DocumentReference by Id Note
EP403 Create document	POST DocumentReference - Create a DocumentReference
EP404 Update document by Id	PUT DocumentReference - Update a DocumentReference Please note: API Manager method shows as PUT however please use POST with request header is_update=true.

5.3. API Manager product subscription

Any new API users should register a user and subscribe to the product [Authorised - UPD API - Milestone 3 \(UPD 1.03\)](#) in API Manager.

The credentials for this new product can be used for all supported endpoints as listed in section 5.2. UPD API supported Product Service endpoints

Refer to the document [UPD 01.03 Registration Process for UPD API in Production/UAT](#) listed in the [References](#) section.

5.4. Apply Chapter 4 Legacy or Chapter 2 Validation rules

When submitting a POST for EP309 Create Product or EP311 Update Product, there is a Request header that is used to specify which validation rules are to be applied.

Please note that each type of update may use a different value for the Key.

Value	Validation rules applied
<i>Request header not included</i>	Vet EUIG Chapter 2
false	Vet EUIG Chapter 2
true	Vet EUIG Chapter 4 Legacy

5.5. API EP309 Create, EP311 Update & Nullify product endpoints

5.5.1. Request headers applicable for all Create, Update & Nullify POST

When submitting a POST for EP309 Create Product or EP311 Update or Nullify Product, the same Request headers are used for all endpoints that specify the format for the request and response.

Request Header: Key	Values	Purpose
Content-type	application/fhir+xml application/fhir+json	Specifies the format of the request body that is being submitted
Accept	application/fhir+xml application/fhir+json	Specifies the format for the response body of the POST if there are any validation or other errors

5.5.2. Create and Update endpoints

- As specified in SPOR API v2 Specification section 6.4.12
- Refer to API Manager developer portal
- The Request body is a Bundle (type=transaction) of MedicinalProductDefinition and other resources
- For all the Update endpoints, the Bundle should be based on all data in the existing product. This includes Update Common Data DCP/MRP/SRP where all existing National data should also be included in the bundle even although it is only Common data that will be updated
- Create MRP is an update to an existing NP product. The Bundle should be based on all national data in that product, with the additional Common data added, and the procedure type updated to MRP

- Create SRP is an update to an existing DCP/MRP/SRP product. The Bundle should be based on all national data in that product, with the additional Common data added
- Please refer to the example bundles and recommended approach sections

Type and Procedure	POST Endpoint	Request header Key for validation rules	Additional Request header
Create NP	/pms/api/v2	chapter4	
Update NP	/pms/api/v2	chapter4	is update = true
Create DCP	/upd/api/v1/dcp-bundle/	chapter4	
Update Common Data DCP/MRP/SRP	/upd/api/v1/common-data-bundle/	chapter4	is update = true
Update National Data DCP/MRP/SRP	/upd/api/v1/national-data-bundle/	chapter4	is update = true
Create MRP	/upd/api/v1/mrp-bundle/	chapter4	
Create SRP	/upd/api/v1/srp-bundle/	chapter4	
Create Registered Homeopathic	/pms/api/v2	homeopathicschapter2 = true OR homeopathicschapter4 = true	
Update Registered Homeopathic	/pms/api/v2	homeopathicschapter2 = true OR homeopathicschapter4 = true	is update = true
Create Parallel Trade	/upd/api/v1/ptp-bundle/	parallelchapter2 = true OR parallelchapter4 - true	
Update Parallel Trade	/upd/api/v1/ptp-bundle/	parallelchapter2 = true OR parallelchapter4 - true	is update = true
To Validate any Create or Update bundle	/pms/api/v2/\$Validate	Use appropriate request header to apply validation rules based on the procedure type	Use is update = true when validating the following bundles: <ul style="list-style-type: none"> • Update NP

Type and Procedure	POST Endpoint	Request header Key for validation rules	Additional Request header
			<ul style="list-style-type: none"> Update Registered Homeopathic Update Parallel Trade Update Common Data DCP/MRP/SRP Update National Data DCP/MRP/SRP Create MRP Create SRP

5.5.3. Nullify endpoint

Type and Procedure	POST Endpoint	Request header Key for validation rules	Additional Request header
Nullify product	/upd/api/v1/vmp-nullification/	not required	

Content-Type	Request body
JSON	<pre>{ "permanentId": "Permanent Identifier" }</pre> <hr/> <p>For example:</p> <pre>{ "permanentId": "600011984989" }</pre>
XML	<pre><root><permanentId> Permanent Identifier </permanentId></root></pre> <hr/> <p>For example:</p> <pre><root><permanentId>600011353107</permanentId></root></pre>

Response to POST:

- Response code 202 Accepted indicates the nullification has been successfully submitted

- Response code 400 Bad request indicates there is a validation error and the Response body will contain error message. For example:
"Resource type 'Bundle' with id '600011984989' couldn't be found."

5.5.4. Response to POST for Create, Update or Nullify and use of Get OperationOutcome

When POST for Create, Update or Nullify is successful and it cannot be honoured timely it is automatically queued. The Response header **Content-Location** contains an id that can be used to obtain the status of the operation.

Content-Location has two parts: **post-operation/operation-outcome-id**

The status of the operation can be consulted, it is one of:

- QUEUED
- IN_PROGRESS
- MSG_CREATED
- ERROR

Upon successful creation, update or nullification of the medicinal product, the operation outcome will show a status of MSG_CREATED along with the unique Permanent identifier(s) of the product(s).

The endpoint GET OperationOutcome/**operation-outcome-id** is used to query the status of the operation and this should be repeated until it is successful with MSG_CREATED or has ERROR.

The format of the Content-Location is showing in the following table, and the response value can be used for Get OperationOutcome.

POST	Content Location example showing format of the operation-outcome-id
Create NP	OperationOutcome/baab996e-8e58-4825-89d1-90a8f30458db
Update NP	OperationOutcome/c2e2275c-141c-4631-a42e-045726d95adb
Create DCP	Release 1.6.16 and prior: dcp-operation-outcome/ddb9f96b-10f5-4428-9503-170feb5c58db-DCP Release 1.6.20 is now: OperationOutcome/ddb9f96b-10f5-4428-9503-170feb5c58db-DCP
Update Common Data DCP/MRP/SRP	Release 1.6.16 and prior: common-data-operation-outcome/f4d76850-358a-48f1-a9bb-3fb4b1615bdb-CD Release 1.6.20 is now: OperationOutcome/ f4d76850-358a-48f1-a9bb-3fb4b1615bdb-CD
Update National Data DCP/MRP/SRP	Release 1.6.16 and prior: national-data-operation-outcome/b371f2db-dd29-4c60-b6ab-63b0abf95bdb-ND Release 1.6.20 is now: OperationOutcome/ b371f2db-dd29-4c60-b6ab-63b0abf95bdb-ND
Create MRP	Release 1.6.16 and prior: mrp-operation-outcome/2f89089c-3ad7-4427-9311-7ea491395ddb-MRP

POST	Content Location example showing format of the operation-outcome-id
	Release 1.6.20 is now: OperationOutcome/2f89089c-3ad7-4427-9311-7ea491395ddb-MRP
Create SRP	Release 1.6.16 and prior: srp-operation-outcome/cf7af9a9-b34d-4db9-a551-89d40c077306-SRP Release 1.6.20 is now: OperationOutcome/cf7af9a9-b34d-4db9-a551-89d40c077306-SRP
Create & Update Registered Homeopathic	OperationOutcome/a588416b-7a0b-40b1-8d03-a88ea4668f8f
Create & Update Parallel Trade	OperationOutcome/04b5bc00-16f4-4ea0-b33e-1a95029d8f8f-PTP

5.5.5. Creating products for DCP or Update Common Data if national data is provided

When the RMS submits a request bundle to create DCP products, they should only provide Common Data. Refer to Annex 1 of Vet EU IG Chapter 2.

If any National data attributes are populated in the create request bundle this does not result in a validation error. The products for the RMS and each CMS will be created, and any national data entered will be silently ignored.

The same applies for Update Common Data. The RMS should populate the complete Update bundle for their RMS product containing all existing Common and National Data. Only Common Data will be updated to the RMS product and the CMS products under the Product identifier.

5.5.6. Key changes in valid request bundle for create and update

Attribute	Change
none	

5.5.7. API EP309 Create product example request bundles

Examples for EP309 Create Product for NP and DCP. Please note that the purpose of these examples is as illustration of the FHIR attributes to be populated.

The value for MedicinalProductDefinition as a cross referenced product is a valid permanent identifier from UAT.

Procedure type	Validation rules	Example file
DCP	Chapter 2	UPD_1.6.5-6_DCP_Chpt2_C2_Mandatory_VetIG.JSON UPD_1.6.5-6_DCP_Chpt2_C2_Mandatory_VetIG.XML UPD_1.6.5-6_DCP_Chpt2_C110_VetEUIG_AllData.JSON

Procedure type	Validation rules	Example file
		UPD_1.6.5-6_DCP_Chpt2_C110_VetEUIG_AllData.XML
DCP	Chapter 4 Legacy	UPD_1.6.5-6_DCP_Legacy_C2_Mandatory_VetIG.JSON UPD_1.6.5-6_DCP_Legacy_C2_Mandatory_VetIG.XML UPD_1.6.5-6_DCP_Legacy_C110_VetEUIG_AllData.JSON UPD_1.6.5-6_DCP_Legacy_C110_VetEUIG_AllData.XML
NAP	Chapter 2	<p>2.2 Authorisation/registration/entitlement number is specified at Product level</p> <p>UPD_1.6.1-4_NAP_Chpt2_C2_Mandatory_VetIG_MANumber_AtMedicinalProductLevel.JSON</p> <p>UPD_1.6.1-4_NAP_Chpt2_C2_Mandatory_VetIG_MANumber_AtMedicinalProductLevel.XML</p> <p>UPD_1.5.1-0_NAP_Chpt2_C110_VetEUIG_AllData_MANumber_AtMedicinalProductLevel.JSON</p> <p>UPD_1.5.1-0_NAP_Chpt2_C110_VetEUIG_AllData_MANumber_AtMedicinalProductLevel.XML</p> <hr/> <p>5.5 Marketing authorisation (package level)</p> <p>UPD_1.5.1-0_NAP_Chpt2_C111_VetEUIG_AllData_MANumber_AtPackageLevel.JSON</p> <p>This example contains 2 packages.</p> <p>There are 3 RegulatedAuthorization resources:</p> <ul style="list-style-type: none"> • One with subject reference = MedicinalProductDefinition resource; populated with attributes from Section 2 (Vet EUIG Chapter 2), excluding the marketing authorisation number • One with subject reference = 1st PackagedProductDefinition resource; populated with the Marketing authorisation number for Package 1 • One with subject reference = 2nd PackagedProductDefinition resource; populate with the Marketing authorisation number for Package 2

Procedure type	Validation rules	Example file
NAP	Chapter 4 Legacy	<p>UPD_1.6.1-4_NAP_Legacy_C2_Mandatory_VetIG_MANumber_AtMedicinalProductLevel.JSON</p> <p>UPD_1.6.1-4_NAP_Legacy_C2_Mandatory_VetIG_MANumber_AtMedicinalProductLevel.XML</p> <p>UPD_1.5.1-0_NAP_Legacy_C110_VetEUIG_AllData_MANumber_AtMedicinalProductLevel.JSON</p> <p>UPD_1.5.1-0_NAP_Legacy_C110_VetEUIG_AllData_MANumber_AtMedicinalProductLevel.XML</p>
NAP	Chapter 4 Legacy	<p>UPD_1.5.1-0_NAP_Legacy_Cx_ManyAttributesAndResources_MANumberAtMedicinalProductLevel.XML</p> <p>This example contains:</p> <ul style="list-style-type: none"> • 2 or more values for those attributes that are repeatable. For example, Product name, ATC Vet Code, Manufacturing Business Operation • 2 Packages (PackagedProductDefinition) • 2 Manufactured Items (ManufacturedItemDefinition) • 3 Ingredients (Ingredient)
NAP	Chapter 2	<p>UPD_1.5.1-0_NAP_Chpt2_ExampleForStrengthAsPresentationOrConcentration.XML</p> <p>This example contains Ingredient resources that illustrate how to specify Substance and Reference Strength as either Presentation or Concentration.</p>
Registered Homeopathic	Chapter 2	<p>UPD_1.6.1-4_HOM_Chpt2_C2_Mandatory_VetIG_MANumber_AtMedicinalProductLevel.JSON</p> <p>UPD_1.6.1-4_HOM_Chpt2_C110_VetEUIG_AllData_MANumber_AtMedicinalProductLevel.JSON</p>
Parallel Trade	Chapter 2	<p>UPD_1.6.8-4_PAT_Chpt2_C2_Mandatory_VetIGI.JSON</p> <p>UPD_1.6.8-4_PAT_Chpt2_C110_VetEUIG_AllData.JSON</p>

5.5.8. Recommended approach to prepare update request bundle

The recommended approach for preparing a request bundle to update a product (any procedure type) is:

- Use the response from EP304 GET MedicinalProductDefinition/{permanent identifier}/\$everything as a starting point
- Add Bundle.entry.request for each resource and update Bundle.type

Attribute	Change
Bundle.type	Must be "transaction"
For every Bundle.entry	<p>Bundle.entry.request must also be populated.</p> <p>Bundle.entry.request.method should be:</p> <ul style="list-style-type: none"> • PUT to update an existing resource • POST to add a new resource <p>Bundle.entry.request.url should be:</p> <ul style="list-style-type: none"> • Same value as Bundle.entry.fullUrl

For example:

```

<?xml version="1.0" encoding="utf-8"?>
<Bundle xmlns="http://hl7.org/fhir">
  <id value="600000022531" />
  <meta>
    <versionId value="1" />
    <lastUpdated value="2021-07-07T08:52:51.607+00:00" />
  </meta>
  <type value="transaction" />
  <entry>
    <fullUrl value="MedicinalProductDefinition/600000022531" />
    <resource>
      <MedicinalProductDefinition>
        ...
      </resource>
    <request>
      <method value="PUT" />
      <url value="MedicinalProductDefinition/600000022531" />
    </request>
  </entry>
  <entry>
    <fullUrl value="PackagedProductDefinition/170427" />
    <resource>
      <PackagedProductDefinition>
        ...
      </resource>
    <request>
      <method value="PUT" />
      <url value="PackagedProductDefinition/170427" />
    </request>
  </entry>
</Bundle>

```

- DO NOT edit or remove the IDs for each resource and in-line within each resource in the EP304 Get \$everything response

5.5.9. How to use Update NP product endpoint and example bundle

Create product via API	POST Bundle	Sample XML bundle used: UPD_1.5.1-0_NAP_Legacy_C110_VetEUIG_AllData_MANumber_AtMedicinalProductLevel.XML
Check operation outcome	MSG_CREATED message expected containing Permanent identifier	
EP304 Get Product Full	Prepare update bundle based on the response by updating Bundle.type to transaction and adding Bundle.entry.request.method for each resource. Edit the payload e.g. <ul style="list-style-type: none"> - modify product name - add another ATC Vet code - add another ManufacturedItemDefinition including this into the existing PackagedProductDefinition 	Sample XML of Get Everything response used as a starting point: UPD_1.5.1-0_EP311_UpdateProduct_GetEverything_version1.XML Update bundle prepared: UPD_1.5.1-0_EP311_UpdateProduct_RequestBundle.XML
Update product via API	POST Bundle with request headers to /pms/api/v2 <ul style="list-style-type: none"> • "is_update=true" • "chapter4" = true or false for the validation rules to apply 	
Check operation outcome	MSG_CREATED message expected containing Permanent identifier	
EP304 Get Product Full	Check the response for modifications	Sample XML of GET everything after update: UPD_1.5.1-0_EP311_UpdateProduct_GetEverything_version2.XML

5.5.10. How to use Update National Data DCP/MRP/SRP product endpoint and example bundle

EP304 Get Product Full	Prepare update bundle based on the response by updating Bundle.type to transaction and adding Bundle.entry.request.method for each resource. Edit the payload and add national data e.g. <ul style="list-style-type: none"> - Product name - Legal status of supply (product level) - Package description 	Create DCP using this example file: UPD_1.6.16-5_CreateDCPForUpdateNationalData.XML Product Identifier: d0f4414c-cd65-478b-921e-f107c66f7a85 CMS for Italy Permanent identifier: 600000251886 Sample XML of Get Everything response used as a starting point:
------------------------	--	---

	<ul style="list-style-type: none"> - Marketing authorisation number (product level) - Marketing authorisation status & dates - Responsible authority 	<p>UPD_1.6.16_DCP_UpdateNationalData_600000251886_GetEverything_v1.XML</p> <p>Update bundle prepared: UPD_1.6.16_DCP_UpdateNationalData_600000251886_BasedOn_v1.XML</p>
Update product via API	<p>POST Bundle with request headers to /upd/api/v1/national-data-bundle/</p> <ul style="list-style-type: none"> • "is_update=true" • "chapter4" = true or false for the validation rules to apply 	
Check operation outcome	MSG_CREATED message expected containing Permanent identifier	
EP304 Get Product Full	Check the response for modifications	<p>Sample XML of GET everything after update:</p> <p>UPD_1.6.16_DCP_UpdateNationalData_600000251886_GetEverything_v2.XML</p>

5.5.11. How to use Update Common Data DCP/MRP/SRP product endpoint and example bundle

EP304 Get Product Full	<p>Prepare update bundle based on the response by updating Bundle.type to transaction and adding Bundle.entry.request.method for each resource.</p> <p>Edit the payload e.g.</p> <ul style="list-style-type: none"> - modify common product name - add another ATC Vet code <p>Important: any national data that has been populated should be also included in the update bundle.</p>	<p>Sample XML of Get Everything response used as a starting point:</p> <p>UPD_1.5.3-4_DCP_UpdateCommonData_Product_600000149642_GetEverything_Version1.XML</p> <p>Update bundle prepared:</p> <p>UPD_1.5.3-4_DCP_UpdateCommonData_Product_600000149642_UpdateBundleBasedOnVersion1.XML</p>
Update product via API	<p>POST Bundle with request headers to /upd/api/v1/common-data-bundle/</p> <ul style="list-style-type: none"> • "is_update=true" • "chapter4" = true or false for the validation rules to apply 	
Check operation outcome	MSG_CREATED message expected containing Permanent identifiers	

EP304 Get Product Full	Only the Common data in the RMS and CMS products under that Product Identifier will be updated	Please refer to Known issues section for any outstanding issues where national data submitted when updating common data is not being ignored.
------------------------	--	---

5.5.12. How to use Create MRP product endpoint and example bundle

EP304 Get Product Full	Prepare update bundle based on the response by updating Bundle.type to transaction and adding Bundle.entry.request.method for each resource.	Sample XML of Get Everything response used as a starting point: UPD_1.5.3-4_CreateMRP_NP_600000184179_GetEverything_version1.XML
Prepare Create MRP Bundle	<ul style="list-style-type: none"> • Change procedure type from NP to MRP • Add Common Name with Country = EU and Language = English • Add Reference member state and Concerned member state • Add Common package description in English (if doesn't exist) 	Create MRP bundle prepared: UPD_1.5.3-4_CreateMRP_BasedOn_NP_version1.XML
Create MRP via API	POST Bundle with request headers to /upd/api/v1/mrp-bundle/ <ul style="list-style-type: none"> • "chapter4" = true or false for the validation rules to apply 	
Check operation outcome	MSG_CREATED message expected containing Permanent identifiers for RMS NP product and products created for each CMS	
EP304 Get Product Full	RMS: <ul style="list-style-type: none"> • Contains the Common data that was added CMS: <ul style="list-style-type: none"> • Each new product is only populated with Common data, with status of Provisional 	

5.5.13. How to use Create SRP product endpoint and example bundle

EP304 Get Product Full	Prepare update bundle based on the response by updating Bundle.type to transaction and adding Bundle.entry.request.method for each resource.	Sample XML of Get Everything response used as a starting point: UPD_1.6.1-4_CreateSRP_RMSProduct_GetEverything_version1.XML
------------------------	--	--

Prepare Create SRP Bundle	<ul style="list-style-type: none"> • Add new Concerned member state(s) • Update common data as required 	Create SRP bundle prepared: UPD_1.6.1-4_CreateSRP_BasedOnRMSProduct_version1.XML
Create SRP via API	POST Bundle with request headers to /upd/api/v1/srp-bundle/ <ul style="list-style-type: none"> • "chapter4" = true or false for the validation rules to apply 	
Check operation outcome	MSG_CREATED message expected containing Permanent identifiers for existing RMS & CMS products and products created for each new CMS	
EP304 Get Product Full	RMS & existing CMS: <ul style="list-style-type: none"> • Contains the new CMS • Procedure type remains unchanged • Contains the Common data that was updated New CMS: <ul style="list-style-type: none"> • Each new product is only populated with Common data, with status of Provisional, and procedure type of SRP 	

5.6. API Manage document

5.6.1. EP403 Create document

Resource Information

Endpoint	POST /pms/api/v2/DocumentReference
Request	
Accept	application/fhir+xml application/fhir+json
Body	<DocumentReference .. </DocumentReference>
Content-type	application/fhir+xml application/fhir+json

Response	
Body	Document with version 1 and document ID returned Note: ID expected format example: <code>3c46270e-3c3d-4869-a73c-ad4d7c3f2893</code>

Query Parameters

None

Example Request

For UAT environment: POST <https://spor-uat.azure-api.net/pms/api/v2/DocumentReference>

Example file for request body: UPD_1.6.1-4_Doc_EP403_CreateDocument.XML

PDF document that was converted to base64: EP403_UploadDocument.PDF

- Document status value is case-sensitive (e.g.: current will work; CURRENT will fail)
- Document language value is case-sensitive (e.g.: en will work; EN will fail)

5.6.2. EP401 Search document

Resource Information

Endpoint	GET /pms/api/v2/DocumentReference?{ param}={value}&{param}={value}]
Request	
Accept	application/fhir+xml application/fhir+json
Body	n/a
Content-Type	n/a
Response	
Body	Bundle of <DocumentReference>(s) e.g. Bundle Total value=N [entry {DocumentReference Resource Type}] *

Path Parameters

Name	Description
Version	Service version number Example value: 2

Query Parameters

Name	Description
related	Permanent identifier of the product the document is related to
type	Type of document
_summary	Boolean set to true or false.

Name	Description
	If set to true, the contents of the document is not populated in the response in DocumentReference.content.attachement,data. There is a url provided but it is not intended that you can use this to retrieve the document.

Example request

GET /pms/api/v2/DocumentReference?related=MedicinalProductDefinition/600000216133

GET /pms/api/v2/DocumentReference?type=100000155538

GET /pms/api/v2/DocumentReference?related=MedicinalProductDefinition/600000216133&_summary=true

5.6.3. EP402 Get/retrieve document

Resource Information

Endpoint	GET /pms/api/v2/DocumentReference/{document-id}
Request	
Accept	application/fhir+xml application/fhir+json
Body	n/a
Content-Type	n/a
Response	
Body	Resource of type MedicinalProductDefinition

Path Parameters

Name	Description
Document id	A unique document identifier UUID Example value: 7a88176d-10f9-4db3-8fa0-4e4ae4594df7
version	Service version number Example value: 2

Query Parameters

None

Example Request

GET /v2/DocumentReference/3c46270e-3c3d-4869-a73c-ad4d7c3f2893

5.6.4. EP404 Update document

Resource Information

Endpoint	POST /pms/api/v2/DocumentReference
Request	
Accept	application/fhir+xml application/fhir+json
Body	<DocumentReference> <id value="fcd2c31c-0ef9-455c-99a0-75149b888a27"/> .. </DocumentReference>
Content-type	application/fhir+xml application/fhir+json
is_update	true
Response	
Body	Document with version number incremented by 1

Query Parameters

None

Example Request

For UAT environment: POST <https://spor-uat.azure-api.net/pms/api/v2/DocumentReference>

Example file for request body:

- GET of document before update: UPD_1.6.1-4_Doc_EP402_GetDocument_version1.XML
- Update posted: UPD_1.6.1-4_Doc_EP404_UpdateDocument_BasedOnVersion1.XML
- Response to POST: UPD_1.6.1-4_Doc_EP404_ResponseAfterUpdate.XML
- GET of document after update: UPD_1.6.1-4_Doc_EP402_GetDocument_AfterEP404Update_version2.XML

5.6.5. Changes for Create and Update document payload

- There are no changes to payload

6. MAH UI

6.1. Scope of this release for MAH UI

- UPD UC03 Search Product via UI
- UPD UC04 Export search results
- UPD UC05 View Product via UI
- UPD UC21 Manage Notifications via UI
- UPD-UC07 Download Packages and Submission of Volume Sales via Form
- UPD-UC27 View Submissions of Volume Sales via Form

- Scenario 1 and 3 – View and Download Volume of Sales as a CA or MAH
- Scenario 2 – View Submissions as MAH
- UC06 Submit VNRA via UI
- UC28 View Variation not Requiring assessment via UI
- UC24 Submit updates for Marketing authorisation status
- UC25 Download ~~and Submit updates~~ for Availability status
 - There are two issues affecting the submission of Availability status. UPD-13458 affecting products under DCP/MRP/SRP where RMS product is always incorrectly updated; and UPD-13635 affecting submission of updates CAP products. Only submission of Availability status for NAP product is possible in this release

Supported browsers for the MAH UI are Chrome and Edge.

6.2. Registration process for access to the MAH UI in production (PROD) environment

To request access:

- If you do not already have an EMA account in the production environment:
 - EAM can be found at: <https://register.ema.europa.eu/identityiq/login.jsf>
 - *Create a new EMA account* Reference guide: <https://register.ema.europa.eu/identityiq/help/selfregister.html>
- Log into EMA Production once registration is complete to Request Access to one of the UPD MAH UI roles
 - select *Request Access for Organizations*. Reference guide: <https://register.ema.europa.eu/identityiq/help/requestaccess.html>
 - choose your country and Organization ID.
 - use “UPD” as a search option to filter available roles
 - select the appropriate role:
 - **UPD Industry Super User** (reminder: attach document as evidence of your authority to manage users for your organisation)
 - **UPD Industry Edit Search View**
 - **UPD Industry Search View**
- Some UPD-specific screenshots can be found in Annex 1.
- The request for the first “UPD Industry Super User” for your organisation will be approved by EMA.
- The approved “UPD Industry Super User” will manage all other access requests for your organisation.
- Once registered, the UI in the production environment can be found at: [Union product database \(upd-portal.azurewebsites.net\)](http://upd-portal.azurewebsites.net)

If you have questions or encounter issues, contact the VMP-Reg User Support via <https://servicedesk.ema.europa.eu/jira/servicedesk/customer/portal/283/group/506>.

7. Known issues

Please refer to Annex 2.

Issue reference is an internal number used by the UPD Project team when managing issues. It has been included as User Support may refer to this reference number when responding to your queries. In addition, you can include this reference number when contacting user support on this topic and seeking clarification.

Filter the columns to find those tickets relevant to your role and for NCAs whether you are an API or NCA User or both.

8. User support

API and UI users may seek support in uploading their legacy data into UPD by contacting the VMP-Reg User Support via <https://servicedesk.ema.europa.eu/jira/servicedesk/customer/portal/283/group/506>.

For the technical team to address your query in a timely manner, please include the following information as appropriate:

- UI: Print screen of the information entered to create a veterinary product (go to your browser settings, select Print (or press Control + P) and "Save as PDF" on your computer)
- API: Operational outcome of the unsuccessful task; the request URL and request headers; and for a Create or Update the request body

Annex 1: UPD-Specific Screenshots for Registration for an Account for the UI

The overall aim of the new access request workflow is to **better guide our users through the entire process, minimise the number of rejections** and to ensure that users can **access EMA’s applications and systems** in a swift and efficient manner.

Furthermore a new **“Manage Access”** tab allows [users](#) and [users administrators](#) to list and revoke access for themselves and for the users of the organisation they manage.

The screenshot shows the 'Manage Access' interface with a table of users and roles. Callouts provide the following information:

- The **Search** bar can be used to filter results on organisations, users or roles.
- Use the **export** buttons to export data and perform more complex filters.
- 10 results** are displayed, further results can be navigated using the paging buttons.

The ‘Manage my access’ tab, marked in red in the visual below, became obsolete, with all procedures now being managed through the ‘Request Access for organisations’ tab and the ‘Manage Access’ tab, marked in green.

Further information on access-management aspects and procedures for requesting and managing access to EMA applications can be found in the recording of the [“EMA Account Management training webinar”](#).

9.1. Request the Super User Role for your Organisation in UAT

1. Connect to EMA test: <https://register-test.ema.europa.eu/identityiq/login.jsf?prompt=true>
2. Go to “Request Access for Organizations” and search for your country and your ORG ID:

01 Search Criteria > 02 Search Organisations > 03 Select Roles > 04 Additional Info > 05 Request Submitted

Search Criteria

Provide the search criteria to look for the desired organisations:

- Select one or more country by typing in the Country field, selected countries will appear under the field
- Provide one of the other search criteria like the organisation name
- By default searches are performed in English (EN). Need more help? Have a look at the [step by step documentation](#).

Country Required

Select Value +

Other Criteria

Organisation ID Organisation Name Location ID City

Postal code Address Language Required

EN

3. Select "UPD" to find the roles:

✓ Select Organisations > 03 Select Roles > 04 Additional Info > 05 Submit Request

Roles

14 results

Search ?

Name	Description	Language Required?

4. Choose the UPD CA Super User role:

UPD CA Super User No

You should request this role if you work for an organisation acting as a regulatory authority (i.e. EC, NCA) and intend to manage (approve/reject/revoke) access to UPD for colleagues of your organisation. The first CA Super User role will be approved by EMA. This role will give you full access (Edit/Search/View) to UPD.

5. In the next screen, upload a document to show your affiliation to your organisation. For now, just upload any document (We'll need the formal document later and will also need this for production)

About

You have selected one or more user administrators roles. The first user administrator of an organisation is validated by the EMA based on provided documentation, please compile and attach the related affiliation template, more information about user administrator roles can be found [here](#). The affiliation template should be signed by a different person from the one submitting the request.

6. Click "Submit"

7. An EMA Super User Approver will now review your request and approve asap or get back to you for more information.

9.2. Request a Member User Role for your Organisation and Affiliate to your Organisation in UAT

1. Connect to EMA test: <https://register-test.ema.europa.eu/identityiq/login.jsf?prompt=true>
2. Go to "Request Access for Organizations" and search for your country and your ORG ID:

The screenshot shows the '01 Search Criteria' step of a five-step process. The 'Country' field is highlighted with a red box and labeled 'Required'. Below it, there are fields for 'Organisation ID', 'Organisation Name', 'Location ID', 'City', 'Postal code', 'Address', and 'Language'. The 'Language' field is set to 'EN' and is also labeled 'Required'. There are 'Reset' and 'Next' buttons at the bottom right.

3. Select "UPD" to find the roles:

The screenshot shows the '03 Select Roles' step of a five-step process. A search bar contains the text 'UPD' and shows '14 results'. Below the search bar is a table with columns for 'Name', 'Description', and 'Language Required?'. The table is currently empty.

4. Choose the UPD CA Edit/Search/View or the UPD CA Search/View role.
5. Submit.

9.3. Request the Super User Role for your Organisation in Production

Note: This is at this point only relevant for UI usage. The model for the API accounts remains as per section 5.3. and the document referred to in section 9. .

1. Connect to EMA production: <https://register.ema.europa.eu/identityiq/login.jsf?prompt=true>
2. Go to "Request Access for Organizations" and search for your country and your ORG ID:

01 Search Criteria 02 Search Organisations 03 Select Roles 04 Additional Info 05 Request Submitted

Search Criteria

Provide the search criteria to look for the desired organisations:

- Select one or more country by typing in the Country field, selected countries will appear under the field
- Provide one of the other search criteria like the organisation name
- By default searches are performed in English (EN). Need more help? Have a look at the [step by step documentation](#).

Search UPD ?

Name	Description	Language Required?
<input type="checkbox"/> UPD CA Super User	You should request this role if you work for an organisation acting as a regulatory authority (i.e. EC, NCA) and intend to manage (approve/reject/revoke) access to UPD for colleagues of your organisation. The first CA Super User role will be approved by EMA. This role will give you full access (Edit/Search/View) to UPD.	No
<input type="checkbox"/> UPD Industry Super User	You should request this role if you intend to manage (approve/reject/revoke) access to UPD for colleagues of your organisation. The first Industry Super User will be approved by EMA and you will need to attach a completed and signed copy of the "Affiliation Template Letter", as proof of authority to represent the organisation. This role will give you full access (Edit/Search/View) to UPD.	No

4. Choose the UPD CA Super User role (NCA) or the UPD Industry Super User role (MAH):

<input type="checkbox"/>	UPD CA Super User	You should request this role if you work for an organisation acting as a regulatory authority (i.e. EC, NCA) and intend to manage (approve/reject/revoke) access to UPD for colleagues of your organisation. The first CA Super User role will be approved by EMA. This role will give you full access (Edit/Search/View) to UPD.	No
<input type="checkbox"/>	UPD Industry Super User	You should request this role if you intend to manage (approve/reject/revoke) access to UPD for colleagues of your organisation. The first Industry Super User will be approved by EMA and you will need to attach a completed and signed copy of the "Affiliation Template Letter", as proof of authority to represent the organisation. This role will give you full access (Edit/Search/View) to UPD.	No

5. In the next screen, upload the nomination letter to show your affiliation to your organisation.

About

You have selected one or more user administrators roles. The first user administrator of an organisation is validated by the EMA based on provided documentation, please compile and attach the related affiliation template, more information about user administrator roles can be found [here](#). The affiliation template should be signed by a different person from the one submitting the request.

6. Submit.

7. An EMA Super User Approver will now review your request and approve asap or get back to you for more information.

9.4. Request a Member User Role for your Organisation and Affiliate to your Organisation in Production

Note: This is at this point only relevant for UI usage. The model for the API accounts remains as per section 5.3. and the document referred to in section 9. .

1. Connect to EMA production: <https://register.ema.europa.eu/identityiq/login.jsf?prompt=true>

See the screenshots in section 9.2. in this annex.

Contact the Super User of your organisation if in doubt on which the correct organisation ID is for your organisation.

Annex 2: Known issues

This table is ordered by Vet EUIG Chapter 2 section; and then by Use Case number for those items without a specific IG reference.

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC08 Update product	API	UPD-7273	1.2 Product Record Status	UC08 Update SC2 Update National - API - UPD-UC08-AC016 - Missing Validation error when update Product Status from Current to Provisional & product has been updated
UC08 Update product	NCA UI	UPD-8246	1.3 Product identifier	Update SRP National data - The Product identifier is displaying [object Object], [object Object]
UC08 Update product	API	UPD-7148	1.4 Permanent identifier	UC08 Update SC2 NAP - should reject update with validation error message if MedicinalProductDefinition.id is not populated
UC08 Update product	API	UPD-9031	1.6 Legal status of supply 5.4 Legal status of supply	If Legal status of supply had been specified at Package level and submit an update to populate at Product level and remove from the package : the updated product still has the previous value at Package as well as the new value at Product level
UC08 Update product	API	UPD-5192	1.6 Legal status of supply 5.4 Legal status of supply	When updating product to change from specifying Legal status of supply at product level to package level, when you retrieve the updated product the previous value is still populated at the product level.
UC08 Update product	API & NCA UI	UPD-11476	1.6 Legal Status 5.4 Legal status of supply	Update National Data DCP/MRP/SRP: if product does not have Legal status of supply populated at either product or package level there should be a validation error. Instead the update is accepted and product is updated
UC01 Create product	API	UPD-4726	1.8.1 Veterinary medicinal product name	MedicinalProductDefinition.name.type used to be an attribute that was required to be populated. This is no longer required to be populated for the create. When you retrieve the product you will find this attribute has been populated with the term code for full name. This will be corrected in a future release.
UC01 Create product UC08 Update product	API & NCA UI	UPD-5531	1.8.2.1 Name type	Do not select term of "Full name" when entering a name part. It is not an option that should be included as an available option. If used, the created/updated product will have an additional full name rather than the intended name part
UC18 Manage document	API	UPD-12477	1.11 Attached Document	Add or Update document via API: if payload is invalid and does not conform to the JSON/XML format (for example there is an extra comma or other formatting control after an attribute) this returns a Response of 500 Internal Server error. Instead it should return Response of 400 Bad Request with details of the error.

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC01 Create product UC08 Update product	NCA UI	UPD-7971	1.11.5 (Attached document) content type	System allows Word .doc/.docx type document to be attached and this should not be valid
UC08 Update product	NCA UI	UPD-12602	1.9.4 (PSM) File location	Chapter 4/Legacy products for all procedure types: if no PSM File Location has been populated the edit screen displays a value of "undefined - undefined". If you submit the update like this there will be a validation error. Click the "X" to delete and then you will be able to Submit the update without a validation error
UC01 Create product UC08 Update product	NCA UI	UPD-6910	1.9.4 (PSM) File location 1.10.3 QPPV Location	The Validate button doesn't highlight PSMF or QPPV Location as missing mandatory fields if the code/contact values populated but no location selected (PSMF for Chapter 2 only)
UC08 Update product	API & NCA UI	UPD-12580	2.4 Responsible Authority 2.8 Product Owner	All procedure types: if product does not contain any existing value for Responsible Authority or Product Owner, when an update is submitted the new LOC-ID is not saved
UC08 Update product	API	UPD-4811	2.4 Responsible authority (organisation) 2.8 Product Owner (organisation)	Change to Responsible authority or Product Owner is not saved if existing inline attribute id is not included in the request body
All UC	NCA UI & MAH UI	UPD-13297	2.5 Authorisation status	CAP products - some products with status of Withdrawn or Surrendered have been loaded into UPD from EMA's source system (SIAMED) with status of Valid
UC08 Update product	API	UPD-11235	2.6 Date of authorisation status change	Update National Data DCP/MRP/SRP or Update NP/Registered Homeopathic/Parallel Trade - if no Date of Authorisation status change attribute populated in payload getting validation error based on Legacy/Chapter 4 rules. It should be optional for Legacy
UC05 View product	NCA UI & MAH UI	UPD-10185	2.7 Marketing authorisation date	When view product, there has been an example where Marketing authorisation date shows differently for MAH and NCA user. Issue is still being investigated but is thought to occur infrequently and examples have differed by 1 day
UC08 Update product	API	UPD-4812	2.13.1 Procedure number	Change to procedure number not saved if existing inline attribute id is not included in the request body

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC08 Update product	NCA UI	UPD-8399	3.1 Ingredient	Update product that has more than one Pharmaceutical product. There will be a validation error when update is submitted if one of the Pharmaceutical Product has no linked Ingredients. Workaround is to ensure at least one Ingredient is linked for each Pharmaceutical Product
UC01 Create product UC08 Update product	API & NCA UI	UPD-7228	4.3.2.1 & 4.3.2.2	UC01 Create & UC08 Update Product - POST should be valid where Reference Strength is populated but there is no Substance Strength; or if specify Substance Strength a Reference Substance and no Reference Substance Strength. Instead there is a validation error and Substance Strength must always be specified
UC08 Update product	NCA UI	UPD-9023	5.6 Manufactured item (in Package)	The quantity and units of presentation are not shown in package table for Manufactured Item. The values are displayed if the package is edited. This is only issue with display of information on the UI and no data has been lost from the product
UC01 Create product UC08 Update product	API & NCA UI	UPD-9338	5.6.2 Manufactured item quantity	The Manufactured Item Quantity will be truncated to 2 decimal places. It should be possible to enter greater precision if required of up to 8 decimal places.
UC01 Create product	NCA UI	UPD-3346	5.6.4 Ingredient (in Manufactured item)	Each ingredient must be selected at least once in one of the manufactured items. This rule is not currently validated. If you don't include an Ingredient in a Manufactured item the product will be created but any Ingredient not referenced may not be saved.
UC01 Create product UC08 Update product	NCA UI	UPD-4863	5.6.4 Ingredient (in Manufactured item)	This should not be mandatory for Legacy products. An ingredient must be selected in this release for the create of a NAP product. It is no longer mandatory for a DCP.
All UC	MAH UI	UPD-9896		All OPAD screens where MAH searches by Product Owner: if the Location in search criteria is for an Organisation that the user has no UPD role for, the screen is blocked with the progress control. User needs to refresh the page to get out of this. The search should return a message of no results found
All UC	API & NCA UI	UPD-13623		OMS to UPD updates: New or Updated Organisations and Locations from OMS are not available in UPD
API Manager	API	UPD-10952		API Manager has duplicate Products listed for "UPD API" (v1 and v3 versions of EP); and exposes many EP not intended to be used by API NCA Users. There should only be the one product at this time with v1 Endpoints
Data fix	NCA UI & MAH UI	UPD-13448		Data Fix Parallel Trade products: where Source Member State product had two or more Ingredients, the first Ingredient from that product was duplicated in the new Parallel trade product. This was due to bug UPD-13162. EMA to query existing Parallel Trade products to identify products that were affected by this issue and then assess how to correct

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC01 Create product	NCA UI	UPD-13465		All procedure types: when adding second Ingredient, the Reference strength "Unit of measurement" drop-down list does not display list of terms so select a value. Second ingredient must first be added and then select Edit to be able to select required Unit of Measurement term
UC01 Create product	API	UPD-13501		All procedure types: Error message of "Failed to generate snapshot" may occur for one or more products in the GET OperationOutcome response. That product will not have been created
UC01 Create product	API & NCA UI	UPD-13702		Create MRP - not able to create MRP from NAP where Marketing Authorisation number is populated at Package Level. The submission of the Create MRP is successful but the transaction does not complete successfully
UC01 Create product	NCA UI	UPD-9013		Create MRP - when Retrieving Product Information in the search dialog, if the enter key is clicked after entering some search criteria the screen changes to be main Search product screen and user is no longer in Create MRP screen. Do not use the Enter key when searching for product
UC01 Create product	NCA UI	UPD-11832		Create MRP : the "Add Package" button remains disabled after entering values for the addition of a package
UC01 Create product	API	UPD-11849		Create NAP via API: if payload contains attributes with CMS information this is accepted and the information stored. These attributes should either give validation error or be ignored as not applicable for this procedure type
UC01 Create product	API	UPD-11277		Create parallel trade product via API: the GET OperationOutcome response is populating in the DCP format and it was expected would use same pattern as NAP
UC01 Create product	API	UPD-12272		Create Parallel Trade via API where referenced product has Authorisation status that is not equal to "Valid" : the response code is Error 500 with no meaningful validation error message
UC01 Create product	NCA UI	UPD-13271		Create SRP - in some situations, the create transaction does not complete. When checking the status using OperationOutcome ID the status remains IN_PROGRESS indefinitely. Issue is still to be investigated but may be related to a large Common product document(s) that exist for the RMS
UC01 Create product	NCA UI	UPD-12904		Create SRP : the RMS should not be able to delete any National Document from the RMS/CMS product retrieved. The delete button is enabled and shouldn't be
UC01 Create product	NCA UI	UPD-13523		Create SRP where RMS product has National document: the National document for the RMS product is being added for the new CMS products and should only be Common Documents
UC01 Create product	API & NCA UI	UPD-10293		If there has been successful rollback in MDM of a transaction when creating a product, there is still a product created (with orphaned entries)

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC01 Create product	API	UPD-4723		PackagedProductDefinition.package.quantity is not an attribute to be populated for a create. When you retrieve the product you will find this attribute has been populated with a value of zero. This will be corrected in a future release.
UC01 Create product	API	UPD-11587		Using \$Validate endpoint for Parallel Trade product: the response code is 400 Bad Request and validation errors that are not relevant for Parallel Trade product are displayed.
UC01 Create product	API	UPD-2765		Validation in all resources of URN UUID for fullURL attribute: letters allowed are only a to f to form the hexadecimal set from 0 to f pattern of 8-4-4-4-12 The post may not be rejected or may not give an error message that clearly identifies this as being the issue
UC01 Create product	NCA UI	UPD-13241		When creating a product and using the Validate button: the delete button from the manufactured item section disappears
UC01 Create product UC08 Update product	NCA UI	UPD-11419		CAP procedure type: create or update with Document of type EPAR is able to be submitted. There is an exception when processing and the document is not saved on the product
UC01 Create product UC08 Update product	API	UPD-13485		Create or Update of NAP - there should be a validation error if payload does not have Legal Status of Supply at either Product or Package level. At present the product is incorrectly being created/updated. Once this issue is resolved we will identify products that do not have Legal status of supply populated so that they can be corrected
UC01 Create product UC08 Update product	NCA UI	UPD-7997		Create/Update of a Product - Error Messages need to be more meaningful
UC01 Create product UC08 Update product	NCA UI	UPD-7964		Date field may give an erroneous value when you click on the date picker widget after entering some partial value manually.
UC01 Create product UC08 Update product	API	UPD-11621		For any product where Reference Strength Denominator has a term from Unit of Measurement list with List ID specified as Unit of Presentation, or vice-versa, there should be a validation error
UC01 Create product UC08 Update product	NCA UI	UPD-13632		If product contains two or more Pharmaceutical products, the labels are not properly formatted on the View product screen. The case where two or more Pharmaceutical products should link to the same Ingredient to be considered and review documentation. An Ingredient may only be linked to one Pharmaceutical product in this release
UC01 Create product UC08 Update product	NCA UI	UPD-5114		UC01 UC08 All procedure types - leading and trailing spaces in free-text fields should be removed by the system before validation
UC01 Create product UC08 Update product	API & NCA UI	UPD-12932		UPD is missing terms from SPOR (RMS) - Units of measurement list

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC01 Create product UC08 Update product	API & NCA UI	UPD- 12950		When create or update product with more than 1 Package and Legal status of supply is populated at Package level, there should be a validation error if Legal status of supply has not been populated for all packages. Instead the product is created/updated
UC01 Create product UC08 Update product	API & NCA UI	UPD- 12406		When processing a Create or Update to product an error occurs on one of the servers "No buffer space available". This results in the create or update being Queued and is never subsequently processed
UC03 Search product	API	UPD- 13658		API user only: A search of products using two parameters of _lastUpdated: the second parameter is ignored and only the first is applied
UC03 Search product	NCA UI & MAH UI	UPD- 12867		Enter some value for search criteria in Authorisation/registration/entitlement number field and submit Search; select to view a product; and then select "Back to search results" option from the View Product page. The Authorisation/registration/entitlement number field displays [object object] and not the value that had been input.
UC03 Search product	MAH UI	UPD- 12230		If search products filtering by Product owner for Location that MAH user is not affiliated to - Error 403 Permission denied message is displayed instead of expected "Results not found"
UC03 Search product	NCA UI & MAH UI	UPD- 12590		If search results require two or more pages, and the last page of search results should contain 51 or more products: the last page of search results is always displaying 100 products
UC03 Search product	API & NCA UI & MAH UI	UPD-5538		Not able to search using marketing authorisation number if has been specified at package level. Affects UI and API
UC03 Search product	NCA UI & MAH UI	UPD- 10219		Reset button does not clear existing search criteria from "Authorisation Country"
UC03 Search product	API & NCA UI & MAH UI	UPD-140		Sort of search results does not work
UC03 Search product	NCA UI & MAH UI	UPD- 13463		The "Active substance and strength column" is including Ingredients that do not have role of "Active". Only Active Ingredients should have details included in this column
UC03 Search product UC05 View Product	API & NCA UI & MAH UI	UPD- 13461		The 'Organisation Name' from OMS is not always displayed for a Product Owner on the Search and View Product screens
UC05 View product	NCA UI & MAH UI	UPD- 13324		CAP products - some products do not have any Substance name displayed. This issue affects only a few products
UC05 View product	NCA UI & MAH UI	UPD- 13628		Package information is not displaying Manufactured item information

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC05 View product	NCA UI & MAH UI	UPD-13494		Pharmaceutical products section: Withdrawal period information is not being listed beside the correct Target species
UC05 View product	NCA UI & MAH UI	UPD-13510		View product which has PSMF populated: PSMF Address is not displayed and has N/A
UC05 View product	NCA UI & MAH UI	UPD-13631		When view previous version for a product it displays manufacturer for Ingredient based on the current version of the product; and not the value that existed in that version
UC05 View product	NCA UI & MAH UI	UPD-13125		When View product QPPV displays as N/A even although the product does have a LOC-ID populated. This affects only some products and may be due to some Data Quality issue in the affected products
UC05 View product	NCA UI & MAH UI	UPD-12279		When view product, dates are different according to browser timezone
UC06 Submit VNRA	MAH UI	UPD-10901		After successful submission of VNRA, if click on the Cancel button the screen should be ready to input another submission. Instead the screen becomes unusable with grey background and MAH needs to refresh the browser page
UC06 Submit VNRA	MAH UI	UPD-11617		For UPD-BR-092 Automated A.1.a for update to MAH : only allow MAH to select LOC-ID for an Organisation that they have affiliation to
UC06 Submit VNRA	MAH UI	UPD-11596		If Submission Comment exceeds limit of 4000 a meaningful error message is displayed. Instead it displays an error of "undefined" in the banner (with red background).
UC06 Submit VNRA	MAH UI	UPD-11632		If submit an automated variation that will update National Data, for example A.1.a to update MAH, for products under DCP/MRP/SRP where National Data has not been populated: the submission fails with a Validation error that the Marketing Authorisation Number has not been populated. The MAH should be able to submit a variation even if the RMS/CMS has not populated national data. As a workaround for this release the NCA will need to populate national data before the MAH can submit the VNRA
UC06 Submit VNRA	MAH UI	UPD-13634		If submit VNRA for an automated variation code for a product that has Marketing authorisation number populated at package level there is a validation error "Unable to find matching profile for PackagedProductDefinition/" displayed and not able to submit VNRA as expected. Further investigation is required as this issue has only been observed in Production and have not been able to reproduce in UAT
UC06 Submit VNRA	NCA UI	UPD-11278		Issue affects EMA/EC users only: When VNRA is submitted, the VNeS files is not reaching the Common Repository for some submissions
UC06 Submit VNRA	MAH UI	UPD-8440		Overall Date of submission shows red outline if it had been populated, then value removed and individual values added for each variation for each product

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC06 Submit VNRA	MAH UI	UPD-12908		Submit VNRA for an Automated code and product that has some Data Quality issue that will prevent that product being updated. There is a validation check made on submission and validation error displayed. However the Permanent Identifier of the product that has failed validation is not listed as part of the message
UC06 Submit VNRA	MAH UI	UPD-7960		Submit VNRA: No search results displayed when the 'Retrieve product' search dialog is opened a second time
UC06 Submit VNRA	MAH UI	UPD-12062		The System is displaying Homeopathic products as available to select in VNRA submission and they should not be included in search results
UC06 Submit VNRA	MAH UI	UPD-13808		VNRA submission for variation code A.1.a : when MAH searches for the proposed MAH and selects a different LOC-ID to the existing LOC-ID from their own Organisation, after clicking Accept the selected location is not displayed in the VNRA Submission screen and therefore the VNRA can't be submitted. If the existing LOC-ID is selected as the proposed MAH LOC-ID this will be successfully displayed in VNRA submission screen and the VNRA can be submitted. It is not known whether this will affect all MAH as when reproducing in UAT it has not affected all test user accounts.
UC06 Submit VNRA	MAH UI	UPD-11256		When selecting products, a search by Product Owner doesn't work if used as criteria for second time
UC06 Submit VNRA	MAH UI	UPD-13778		When submitting VNRA and error is displayed of "System error: try again in a few minutes": on some occasions the message may be misleading as the Submission has been successful and is available with Submission ID. Therefore, duplicate submissions may be inadvertently created if submission had been retried. If system error is received on submission we recommend that a search is made of Pending VNRA before retrying in case the first submission had been successful.
UC06 Submit VNRA	MAH UI	UPD-13483		When submitting VNRA there may be a timeout error message displayed. Further investigation is required to understand why this issue occurs and may be related to the number of organisations an MAH user is affiliated to
UC06 Submit VNRA	MAH UI	UPD-13125		When View product QPPV displays as N/A even although the product does have a LOC-ID populated. This affects only some products and may be due to some Data Quality issue in the affected products
UC06 Submit VNRA UC28 View VNRA	NCA UI & MAH UI	UPD-10184		Accented and special characters for all EU languages are not correctly displayed for Product Name and Package description. Some are OK but others aren't
UC07 Submit Volume of Sales	MAH UI	UPD-9868		Download Packages - some users receive the following error and download file is not created: "ERROR Resource(s) not found for User Id: Y and Organisation Id: X" (from release 1.5.4)

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC07 Submit Volume of Sales	MAH UI	UPD-13467		Submission of Volume of Sales - validation is missing for ERR.02 (product status is Current or Provisional) & ERR.15 (Species Split should be between zero and 100)
UC07 Submit Volume of Sales	MAH UI	UPD-13794		Volume of Sales Download list of Packages - the csv file is missing a column for "Comment" data. If file is used to prepare a submission file without populating the missing column there will be a validation error on submission "ER.04: The number of columns provided is not correct"
UC08 Update product	API & NCA UI	UPD-10288		A Product stuck in 'pending' state from a previously failed update transaction cannot be updated
UC08 Update product	API & NCA UI	UPD-12949		Able to submit update but does not complete successfully where product has Data Quality issue. OperationOutcome result displays ERR-1003. This is due to incomplete and orphan records for product names in the underpinning PMS MDM database. Affects about 56 products
UC08 Update product	NCA UI	UPD-7996		Add button in Package medicinal product section needs to have more meaningful caption
UC08 Update product	NCA UI	UPD-13678		All procedure types: it is not possible to update an existing document and upload a document with size > 2MB
UC08 Update product	NCA UI	UPD-12726		Bulk Transfer of ownership - Incorrect validation error does not allow NCA to submit any update. This is a Regression issue from previous release.
UC08 Update product	NCA UI & MAH UI	UPD-11819		For CAP products: there are examples where two products have been created and expected just one. This may occur when a new package has been added or package information has been updated. The cause of the issue will be resolved and affected products corrected
UC08 Update product	API & NCA UI	UPD-13273		For National Procedure (NAP) products that have a Data Quality issue and have been loaded without a value for Legal status of supply: when update to add value is submitted and processed, the new value for Legal status of supply has not been saved in the updated version of the product. EMA will follow-up to identify affected products and see if we can update using a Data fix. Any missing validation on Create of a product will be resolved in a separate ticket.
UC08 Update product	NCA UI	UPD-13466		If product name has been incorrectly duplicated for a language/country and you edit the product to remove one of the duplicated names, the updated product still contains both product names
UC08 Update product	NCA UI	UPD-12399		The edit screen freezes and does not successfully load if the selected product has an invalid LOC-ID for the Product owner. This situation was possible in a previous release due to a bug.

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC08 Update product	NCA UI	UPD-7247		UC08 - Update DCP SC2 National data - Able to add a new Pharmaceutical Product which is a Common data; advised successful but Get OperationOutcome has Validation error
UC08 Update product	NCA UI	UPD-13334		UC08 Update CAP - not able to add multiple Public Assessment Report documents. As a workaround from release 1.6.20 are able to use Bulk Upload to load multiple PuAR documents for a CAP product (as long as each document has a unique filename)
UC08 Update product	NCA UI	UPD-13454		Update Common Data and Update National Data DCP/MRP/SRP: the edit screen displays a warning message at the top advising of Pending VNRA submissions for the product. The same warning message should also be included in the confirmation dialog after clicking the Update product button
UC08 Update product	NCA UI	UPD-13140		Update Common Data DCP/MRP/SRP - after successful submission and processing of an update to remove withdrawal period notes, the updated version of the product still contains the notes and they cannot be removed
UC08 Update product	NCA UI	UPD-13495		Update Common Data DCP/MRP/SRP and remove a Common Document: a Notification for action of "Delete Document" is only being created for the RMS product and not for each of the CMS products. The RMS and CMS products have been correctly updated and the common document removed.
UC08 Update product	API	UPD-10607		Update Common Data DCP/MRP/SRP by API only - not all expected Validation errors are displayed if Mandatory attributes are not populated in POST for Update Common
UC08 Update product	NCA UI	UPD-13335		Update DCP/MRP/SRP Common data - It is possible remove a Manufactured item that is still referenced from a Package and this should not be allowed
UC08 Update product	NCA UI	UPD-12239		Update NAP - deletion of existing Pharmaceutical product and addition of a new Pharmaceutical product removed the existing Ingredients from the updated product
UC08 Update product	NCA UI	UPD-13486		Update National Data DCP/MRP/SRP - a CMS is able to delete a Package and this should not be possible. If they do proceed to update only the CMS product is updated but is now not aligned with RMS and other CMS products
UC08 Update product	NCA UI	UPD-13484		Update National Data DCP/MRP/SRP - if strength has a numerator of zero, there is an incorrect validation error when attempting to update the product
UC08 Update product	API & NCA UI	UPD-13791		Update National Data DCP/MRP/SRP - not able to update National Data when Marketing Authorisation number provided at package level. There is a validation error
UC08 Update product	NCA UI	UPD-12905		Update National Data DCP/MRP/SRP - Visually looks like can delete a CMS as has "x". However, CMS can't be removed as nothing happens when click on "x"

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC08 Update product	NCA UI	UPD-13148		Update National Data for DCP/MRP/SRP where product doesn't have Pack Size populated: get validation error when populate Marketing Authorisation Number at Package Level
UC08 Update product	NCA UI	UPD-10287		Update National DCP/MRP/SRP - the confirmation modal message lists all RMS and CMS countries, and should just be the authorisation country from the product that is being updated
UC08 Update product	NCA UI	UPD-13274		Update National Procedure (NAP) to remove an Ingredient. In the updated version of the product the Ingredient data for the one that remained has been corrupted. The Ingredient that had been removed still exists in the product but does not contain reference to the Pharmaceutical product.
UC08 Update product	API & NCA UI	UPD-13296		Update of product fails leaving product in Pending state and this blocks and subsequent update
UC08 Update product	API & NCA UI	UPD-12385		Update of product fails with error in GET OperationOutcome of ERR-1003. An error from previous failed update with an incorrect payload prevents a subsequent update
UC08 Update product	NCA UI	UPD-13430		Update package where pack size has not been populated: an incorrect validation error related to pack size is being displayed and therefore this prevents any update to the package. This affects NAP and also Update of National Data DCP/MRP/SRP to edit national package description
UC08 Update product	API	UPD-12286		Update Parallel Trade via API fails with validation error messages relating to RMS and CMS (regression issue from previous release)
UC08 Update product	API & NCA UI	UPD-12396		Update product - error regarding buffer space for connections occurs on server but flag is not set to error preventing further updates and advising user that existing transaction needs to be completed before they submit another
UC09 Approve/Reject VNRA	NCA UI	UPD-9866		If an NCA is affiliated with two or more Organisations, they should only be able to view and approve/reject VNRA for submissions of NP products where they are the Responsible Authority; or DCP/MRP/SRP where they are RMS/CMS
UC09 Approve/Reject VNRA	NCA UI	UPD-13793		If VNRA submission contains a product that has been nullified after the VNRA was submitted - the Decision comment entered at submission level is not being replicated into all product cards. Those product cards listed in the submission below the nullified product may not have had the decision comment populated and the field at product card level will need to be populated
UC09 Approve/Reject VNRA	NCA UI	UPD-11052		UC09 Approve/Reject VNRA NCA - When the user views a Pending submission and clicks on Cancel button empty blank cards are showing on the screen

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC09 Approve/Reject VNRA	NCA UI	UPD-13497		Where VNRA submission contains two or more Variation codes, and the NCA approves each variation in a separate submission: when the second and subsequent variations are being approved a "VNRA approved" notification is also being created for the variation codes that had already been approved.
UC18 Manage document	API	UPD-12249		Create or Update of Document via API - infrequently the POST fails with response code 500 Internal server error. This is an intermittent issue as POST of the same payload is subsequently successful. This is an issue only observed in PROD environment
UC18 Manage document	API	UPD-11460		EP403 Create Document for CAP with document type of EPAR: get a validation error even although payload is valid
UC19 Nullify product	API	UPD-13659		After successful POST of nullification, the initial response to GET OperationOutcome/ID is 404 not found. Subsequent GET are OK and show the status of the nullification transaction. This is not an issue for any of the Create or Update POSTs. As a workaround, a delay of few seconds should be included prior to submission of the first GET OperationOutcome, or handle response of 404 not found and resubmit
UC19 Nullify product	API	UPD-11471		Any procedure type: After product has been nullified, able to submit a subsequent update product which is accepted and processed. There should be a Validation error
UC19 Nullify product	API	UPD-10057		API Manager Nullification endpoint: when Try It option is selected the Content-Type request header defaults to application/json and it should be application/fhir+json. Using the default value will give an error
UC19 Nullify product	NCA UI	UPD-9830		When you nullify a product, the confirmation message does not include the Permanent Identifier
UC21 Manage Notifications	NCA UI & MAH UI	UPD-10184		Accented and special characters for all EU languages are not correctly displayed for Product Name and Package description. Some are OK but others aren't
UC21 Manage Notifications	NCA UI & MAH UI	UPD-13049		Date format inconsistent between different actions
UC21 Manage Notifications	NCA UI	UPD-8340		For an update National Data for DCP/MRP/SRP UPD-UC08-AC018, the CMS should only see notifications for their own product. At present they also see notifications for RMS & other CMS products
UC21 Manage notifications	MAH UI	UPD-13676		MAH user who is not the Product owner may be able to view notifications for VNRA Approved and VNRA Rejected for a VNRA Submission for another Product owner. The MAH who is not the product owner is not able to view the VNRA Submission or the product
UC21 Manage notifications	NCA UI & MAH UI	UPD-11827		Not able to search notifications using Procedure number

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC21 Manage Notifications	NCA UI	UPD-13811		Notification for VNRA actions Submitted/Approved/Rejected for a NAP product should not be visible for an NCA who is not the Responsible Authority
UC21 Manage Notifications	NCA UI & MAH UI	UPD-12454		Notifications are sometimes missing for some actions. For example Create DCP - only notifications received for some CMS even although transaction has been completed successfully and products have been created
UC21 Manage Notifications	NCA UI & MAH UI	UPD-13656		Search of notifications with filter of "VNRA Rejected" and Authorisation Country "Romania" displays a system error. This is the only Authorisation country that displays an error for Action of "VNRA Rejected". Filtering by just "VNRA Rejected" or "Romania" does list notifications
UC21 Manage Notifications	NCA UI & MAH UI	UPD-12334		The Notification for Update NAP without document shows action as "Update, Upload Document" and should be "Update"
UC21 Manage Notifications	NCA UI & MAH UI	UPD-12591		VNRA Submitted action: the notification card has incorrect labels. Decision Comment should be Submission Comment. Date of Decision should be Date of Submission. Date of Implementation is not displayed. The correct values of the submission date and submission comment are displayed.
UC21 Manage Notifications	NCA UI & MAH UI	UPD-13137		When submission of Bulk Upload has failed: the Notification card does not match the definition documented in "UPD - Notifications in processes"
UC21 Manage Notifications	NCA UI & MAH UI	UPD-13135		When submission of VNRA has Failed: The notification card for action of "VNRA failed" does not match the definition documented in "UPD - Notifications in processes"
UC24 Marketing authorisation status	MAH UI	UPD-12888		Sorting of the product search results table by any column does not work
UC24 Marketing authorisation status	MAH UI	UPD-12092		When MAH selects to update a product that has some data quality issue, the screen hangs on submission due to a validation error. This validation error is not shown to the user. The submission should fail with validation error displayed to the user.
UC25 Update Availability status	MAH UI	UPD-13491		After searching for products, selecting products and download file: when click on the Reset button any search criteria in Product name and Permanent Identifier fields is not being cleared
UC25 Update Availability status	MAH UI	UPD-12934		Availability Status Date format of YYYY-MM is not accepted though Chapter 7 states it should
UC25 Update Availability status	MAH UI	UPD-13487		Download product data file and select all products from several pages may result in a timeout error
UC25 Update Availability status	MAH UI	UPD-7980		Not able to select all products to download in the one csv file if product search results are over two or more pages
UC25 Update Availability status	MAH UI	UPD-13467		Submission of Availability Status - validation is missing for ERR.02 (product status is Current or Provisional)

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC25 Update Availability status	MAH UI	UPD-13458		Submission of Availability status for CMS product under DCP/MRP/SRP is incorrectly updating the RMS product with the new availability status and not the CMS product specified in the csv file. Therefore we recommend not to submit any updates for Availability status in this release although updates for NAP is not affected by this issue. This issue is expected to be resolved in 1.6.22
UC25 Update Availability status	MAH UI	UPD-13481		When select to download file the search products grid has an incorrect column heading for "Marketing authorisation status". Column heading is currently "Marketing status"
UC27 View Volume of Sales	MAH UI	UPD-13321		View Submissions of volume of sales - clicking the Reset button doesn't clear the search results table of previous search results
UC27 View Volume of Sales	NCA UI & MAH UI	UPD-13294		View Volume of Sales - changing search results from default of 20 products per page doesn't always change number of products in Search results table; and may also affect navigation through search result page
UC27 View Volume of Sales	MAH UI	UPD-13292		View Volume of Sales (MAH users only) MAH products with submitted values for Volume of Sales are not being displayed as expected and need to paginate through search results to see list of all products that have had sales data loaded
UC27 View Volume of Sales	NCA UI & MAH UI	UPD-13796		When download file to view submitted Volume of sales for a product, the downloaded csv file has not populated the column for "Creation date of product"
UC28 View VNRA	NCA UI	UPD-13717		For a VNRA submitted for a product where the Responsible Authority is not correctly populated (for example may have incorrectly been populated with MAH LOC-ID): an NCA User for that Authorisation country is not able to view the VNRA Submission even after the Responsible Authority has been corrected in the product(s) included in the submission
UC28 View VNRA	NCA UI	UPD-9866		If an NCA is affiliated with two or more Organisations, they should only be able to view and approve/reject VNRA for submissions of NP products where they are the Responsible Authority; or DCP/MRP/SRP where they are RMS/CMS
UC28 View VNRA	NCA UI & MAH UI	UPD-13779		If submit a search using Product name as search criteria (either default of starts with or select contains) and view a submission from search results: when you return to the search results screen the search field includes a suffix of "&productNameContains". This suffix will need to be removed from the end of the product name in order to be able to submit a subsequent search using that same name

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC28 View VNRA	NCA UI	UPD-12886		NCA Germany only for DCP/MRP/SRP where National Data has been populated with Responsible Authority of either PEI or BVL. Where VNRA Submission made for product: Both PEI and BVL can view and approve the submission and they should only be able to view those submissions where they are the Responsible authority. Only where National Data has not been populated and Responsible Authority is the default value of EMA both PEI and BVL should be able to view a VNRA submission.
UC28 View VNRA	NCA UI & MAH UI	UPD-13673		New search criteria of date displays the date in the wrong format. Displays as mm-dd-yyyy instead of dd-mm-yyyy. The value specified is correctly applied when searching and the search results do match the selected date(s)
UC28 View VNRA	NCA UI & MAH UI	UPD-11574		Sometimes when selecting to view a submission the display is incomplete (empty boxes for combination of VNRA code & product). Viewing the submission at another time is successful. Potentially only an issue when also experience issues searching products due to timeouts in the UI
UC28 View VNRA	MAH UI	UPD-10911		View partially approved VNRA and message is displayed "System error: try again in a few minutes". Waiting some time and retrying will not work and it will always fail to display
UC28 View VNRA	NCA UI	UPD-13452		When NCA views a VNRA submission where one of more products in that submission were included in some other submission: the warning message listing pending VNRA is now incorrectly including submission ID that have been approved or rejected. It should only be listing pending VNRA
UC28 View VNRA	NCA UI & MAH UI	UPD-13812		When selecting "View VNRA Submissions" from the menu, or enter some search criteria and Submit: there may be a timeout error displayed. This does not happen for all users and to-date has only been observed for some MAH. As a workaround enter additional search criteria to reduce the number of search results to be returned.
UC28 View VNRA	NCA UI & MAH UI	UPD-13320		When View submission page, Download PDF, or View a Submission - timeout error is received. Some changes had been in PROD 7/02/23 but issue may still occur. The issue seems to occur for submission with many products and variatin codes (and thus the size of the submission), or may be related to the number of organisations an MAH is affiliated to. Further investigations are ongoing
UC28 View VNRA	NCA UI & MAH UI	UPD-13805		Where submission search results are listed on 2 or more pages (based on the number of records per page that has been selected) and user views a submission from page 2 or some subsequent page: when select "Back to search results" the first page of search results is displayed and not the page the user had been viewing. If any search criteria had been entered these are retained and the search results displayed are based on that criteria

Use Case	Affects user	Issue reference	Vet EUIG Chapter 2 section	Known Issue Description
UC34 Bulk Upload for Documents	NCA UI & MAH UI	UPD-10698		After successful Bulk Upload of one or more documents, 'Date of Action' and 'Version number' are not populated in Notification card when viewing Notification
UC34 Bulk Upload for Documents	NCA UI	UPD-13677		Bulk Upload is not accepting file for document type pllabb
UC34 Bulk Upload for Documents	NCA UI	UPD-12937		Can't submit file using Bulk Upload for Registered Homeopathic product as receive validation error "ERROR: Your organization is not the Responsible Authority of this/these product(s)."
UC34 Bulk Upload for Documents	NCA UI	UPD-13642		CAP product only for Document type PuAR: if PDF filename is the same as an existing document for PuAR there will be two documents show but both will have content of the most recent document that was loaded for that filename
UC34 Bulk Upload for Documents	NCA UI	UPD-13298		Documents have been successfully added to the product but a Notification has not been created for each of the documents that were successfully loaded
UC34 Bulk Upload for Documents	NCA UI	UPD-10699		For CAP products - EPAR document type is not available and it should be possible to add multiple EPAR documents for a CAP product
UC34 Bulk Upload for Documents	NCA UI	UPD-11376		For CAP products only: review document types that can be loaded as only expected PuAR, EPAR and Combined to be valid
UC34 Bulk Upload for Documents	NCA UI	UPD-12182		Notifications are not all generated after uploading multiple documents using the bulk upload functionality (files have been added to the product)
UC34 Bulk Upload for Documents	NCA UI	UPD-13641		Validation is not being applied when there are two or more documents in the same submission for a product for same Document type/Country/Language. Except for document type PuAR for a CAP product, it should not be possible for a product to have more than one document for combination of Document type/Country/Language
UC39 UPD Usability aspects	NCA UI & MAH UI	UPD-13270		The expected warning message when 5 minutes of active session are left is not displayed

Annex 3: Release Schedule

	Environment	From	To	Description
1	UAT	24 Feb 23	28 Feb 23	Upgrade of UPD to 1.6.20
2	PROD	09 Mar 23	09 Mar 23	Upgrade of UPD to 1.6.20
3	UAT (TBC)	24 Mar 23	24 Mar 23	Upgrade of UPD to 1.6.22
4	PROD (TBC)	30 Mar 23	31 Mar 23	Upgrade of UPD to 1.6.22
5	UAT (TBC)	05 Apr 23	05 Apr 23	Upgrade of UPD to 1.6.23
6	PROD (TBC)	17 Apr 23	17 Apr 23	Upgrade of UPD to 1.6.23
7	UAT (TBC)	20 Apr 23	20 Apr 23	Upgrade of UPD to 1.6.24
8	PROD (TBC)	02 May 23	02 May 23	Upgrade of UPD to 1.6.24
