Good Clinical Practice

ICH E6(R3) update from ACT EU (PA4)

Annual Workshop of the European network of paediatric research at the
EMA

Presented by Kim Pietsch on 10 October 2023
Seconded National Expert (DE-PEI), Inspections office, EMA

Roadmap and timeline towards ICH E6(R3)

- Consultation dates: 26 May to 26 Sep 2023 (principles and Annex 1).
- Anticipating finalization as a step 4 document to be implemented in the local regional regulatory system: Sep/Oct 2024

Submission of comments on ICH E6 (R3) Guideline for Good Clinical Practice

Please note that these comments and the identity of the author will be published unless a specific justified objective is required.
When completed, this form should be sent to the European Medicines Agency email address, in email format, last name, first name, to the following address:

ich_e6_r3_guideline@gmp@ema.europa.eu

All the fields with an asterisk (*) should be filled in prior to completing the columns "Comment and rationale" and/or "Proposed changes / recommendations".

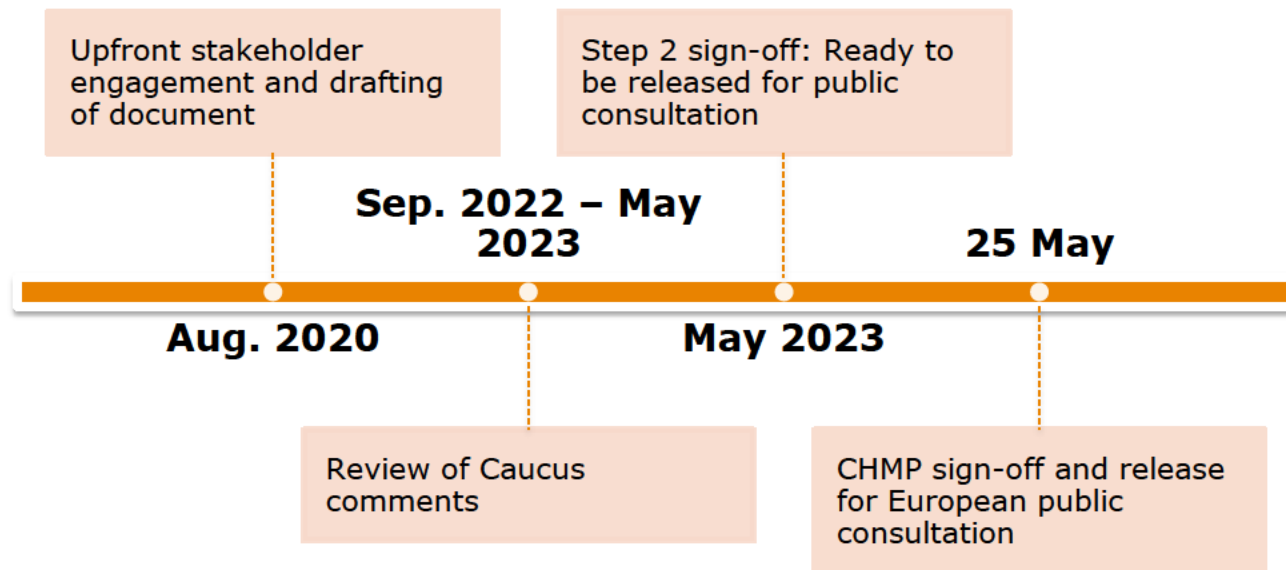

For more details on how to use this template please refer to the ICH "Manual for commenters".

Details of assessed objectives:

- When the suggested change could substantially modify the core provision, and if not implemented, has a significant impact on the guideline.
- When the suggested change leaves the major intent of the core provision, and if not implemented, may have a significant impact on the guideline.
- When not implemented, the modification is only intended to correct grammar or spelling issues, or all in comprehensibility with no change to the core provision.

Serial number	Date of submission	Topic	Line	Comment and rationale	Proposed changes / recommendations (if applicable, use the word "Change" and specify)	Category of assessment (if applicable, see above instructions)

Progress so far (Principles and Annex 1)

Source: ICH E6 (R3) workplan

Next steps (Principles and Annex 1)

26 Sep 2023: Closing date for comments to the European group

Nov 2023: Begin review of public comments from all regions

Aug/Sep 2024: Step 3 sign off of technical document

Sep/Oct 2024: Step 4 adoption of technical document

Thank you for your interest in ICH E6(R3) Good Clinical Practice.

[ICH E6\(R3\) Guideline Availability Notice](#)

Thank you for your interest in ICH E6(R3) Good Clinical Practice.

The ICH E6(R3) Expert Working Group (EWG) has developed and drafted a revised guideline while considering a variety of clinical trial designs and settings. The EWG intends to encourage the use of innovation and technologies that have the potential to make clinical trials more efficient.

We greatly appreciate your comments. As we anticipate an extraordinarily large number of comments, we strongly encourage you to consider the following when drafting your comments:

- Prioritizing or highlighting key comments.
- Correlating your comment with the corresponding line number of the draft guideline to make it easier for us to identify relevant text.
- Providing justification and any relevant examples to support suggested changes.
- Consolidating comments from the same organisation, if appropriate.

We are requesting inputs across all topics addressed in this draft guideline, but please focus on key issues and consider providing insights on:

- Areas that may need additional clarity or language that may be susceptible to misunderstanding.
- Areas that may not accommodate technological innovations and design elements that are being explored to make clinical trials more efficient (we welcome examples to help inform us).
- Training components that should be included to make global GCP training useful as the EWG is planning to develop training materials for ICH E6(R3).

[E6\(R3\) Guideline Availability Notice.pdf \(ich.org\)](#)

What is unique about E6(R3) structure and content?

New structure to provide clarity and better readability

Principles to remain relevant as technology, methods, and trial design evolve

Annexes and appendices (better flow and a strategy intended to enable easier and faster updates in the future)

Focused **scope**

Language to **facilitate innovations** in trial design & technology

Enabling DCTs and PoCs among other design elements

Expect the use of DHTs, healthcare infrastructure, and other design elements & tools to recruit/retain, capture data, monitor, and to analyze results

Link to the recording and summary of records of the ACT EU PA4 workshop on ICH E6(R3) public consultation

- 13-14 July 2023
- Link to the eventpage: [ACT EU PA04 - Multi-stakeholder Workshop on ICH E6 R3 - Public Consultation | European Medicines Agency \(europa.eu\)](#)
- ICH step 2b presentation: [ICH-E6\(R3\)](#)

Brief update on comments received during the PC in the EU

Over 60 stakeholders

Over 1500 comments in total

Too early to share further details on the comments received

- All comments received will be published in accordance with existing policies.

Next steps:

Identify major trends/themes and bring forward to the ICH E6(R3) EWG for further discussion and consideration.

According to the published ICH E6(R3) EWG work plan step 4 adoption of draft guideline (principles and Annex 1) is anticipated for Jun/Jul 2024

E6 (R3) Draft Guideline

E6 (R3) draft guideline subject to public consultation consists of parts I, II, III (composed of 4 sections), glossary, and appendices.

I. INTRODUCTION

II. PRINCIPLES OF ICH GCP

III. ANNEX 1

1. Institutional Review Board/Independent Ethics Committee (IRB/IEC)
2. Investigator
3. Sponsor
4. Data Governance – Investigator and Sponsor

GLOSSARY

APPENDICES

Appendix A. Investigator's Brochure

Appendix B. Clinical Trial Protocol and Protocol Amendment(s)

Appendix C. Essential Records for the Conduct of a Clinical Trial

Open for public
consultation
now

Work Started on E6(R3) Annex-2

Expected finalisation: TBA

The proposed development of Annex 2 will include additional considerations on how GCP principles may be applied across a variety of trial designs and data sources, where applicable. This will include:

- 1- Decentralised elements, where some or all trial-related activities occur at locations other than traditional clinical trial sites, such as patient homes, mobile trial units, or local clinics, and data collection may occur remotely.
- 2- Pragmatic elements, reflecting trials that closely resemble routine clinical practice.
- 3- Real-world data (RWD) sources², for example, the use of registries, electronic health records (EHR), hospital data, pharmacy and medical claims data or wearables.

ACT EU PA4 – Modernisation of GCP

[Homepage \(europa.eu\)](https://european-commission.europa.eu) – Accelerating Clinical Trials in the EU

- The Accelerating Clinical Trials in the European Union (ACT EU) initiative will support smarter clinical trials through regulatory, technological and process innovation.

Our vision is to transform the EU into a region that supports **clinical trial development** and enables **collaboration and innovation** at all stages of the clinical research lifecycle.

Seamless coordination among stakeholders, regulators and ethics committees will lead to more cross-border collaboration.

The result will be better, more impactful clinical trials, **benefitting patients and healthcare in Europe** in the process.

The new work plan is currently drafted and discussed

We will keep you informed
