Checklist for Initial Notifications for Parallel Distribution

Guidance for industry

The European Medicines Agency (hereinafter 'the Agency') asks its applicants to use this checklist in advance of submission of an initial notification for parallel distribution. You should be able to answer "Yes" to every item listed below unless a specific point is not applicable ("n/a") to the application in question. In order to improve the quality of submissions, it is recommended to include the checklist with your submission.

Upon receipt of an initial notification for parallel distribution, the procedure manager proceeds to validate the documentation submitted in accordance with the checklist included below.

Updates to the information included in the IRIS form after submission of any notification for parallel distribution are only possible in exceptional cases, so the applicants should review the information included in the form carefully before submitting. Changes impacting fees would not be possible after submission. Only changes requested by the assessor would be possible and only by exception when properly justified.
